PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and enhanced **React Native** mobile applications for real-time financial trading platforms, delivering **high-performance user experiences** across iOS and Android with optimized rendering and state management using **Redux**.
- Built and shipped mobile features using **agile methodologies** in fast-paced development environments, collaborating with cross-functional engineering, design, and product teams to continuously iterate and improve the mobile experience.
- Implemented **RESTful APIs** and **WebSocket-based services** for real-time data streaming and live updates, ensuring **scalable app architecture** that supports rapid user growth while maintaining application responsiveness at scale.
- Optimized application performance and responsiveness by implementing **mobile performance optimization** techniques, reducing load times by **30%** and improving frame rates for large-scale data visualization components handling complex financial datasets.
- Architected and deployed **data visualization components** using **React Native** to render large-scale real-time data streams, integrating live market feeds and ensuring smooth, responsive UI rendering under high-throughput conditions.
- Contributed to code quality, testing frameworks, and continuous improvement of mobile architecture through **code reviews, CI/CD pipelines (GitHub Actions)**, and agile sprint ceremonies in a distributed, globally collaborative engineering team.

SKILLS

Mobile Development – React Native, JavaScript (ES6+), Redux, Expo, React Native ecosystem best practices.

Real-Time Integration – RESTful APIs, WebSocket-based services, real-time data streaming, live data synchronization.

Performance & Architecture – Mobile performance optimization, scalable app architecture, responsive UI rendering, application responsiveness at scale.

Development Practices – Agile methodologies, code reviews, CI/CD pipelines, GitHub Actions, distributed team collaboration.

Native Mobile Tools – Xcode, Android Studio, native mobile development principles.

Data Visualization – Large-scale dataset rendering, complex financial data visualization, real-time chart and graph components.

Languages & Fundamentals – JavaScript, TypeScript, problem-solving, user-centric design principles.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Real-Time Mobile Financial Trading Dashboard (HCL Technologies)

- Engineered a **React Native** mobile application for a fintech platform supporting real-time trading operations, integrating **WebSocket services** to stream live market data and execute trades with **sub-second latency**.
- Designed and implemented **data visualization components** using **Redux** state management to render complex financial datasets (price feeds, order books, transaction histories) across hundreds of concurrent users without performance degradation.
- Optimized mobile performance through **code-splitting**, **lazy loading**, and **memory profiling**, reducing bundle size by **22%** and achieving smooth 60 FPS rendering on both iOS and Android devices during high-volume data updates.
- Collaborated with product and design teams to define, design, and deliver innovative mobile UX features for payment execution, portfolio management, and real-time notifications, shipping **5+ major feature releases** in agile sprints.

Ireland Jobs Tracker – AI-Powered Resume Builder (Personal Project)

- Built an end-to-end full-stack application integrating the **Claude API (Anthropic)** to generate job-description-tailored resumes at scale using advanced **prompt engineering** and **structured JSON** constraint guardrails.
- Orchestrated AI workflow automation combining **Apify web scrapers** for job ingestion, **Claude API** for intelligent content generation, **reportlab** for PDF synthesis, and **GitHub Actions CI/CD** for automated deployment to **Vercel**.
- Demonstrates hands-on expertise in modern JavaScript frameworks, **REST API integration**, asynchronous data pipelines, and full-stack application delivery relevant to fintech and real-time data-driven mobile platforms.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
