PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and implemented **secure cloud-native applications** on **AWS** (EC2, S3, Lambda, CloudWatch) with **Infrastructure as Code** principles; integrated **CloudFormation** templates for tamper-proof, audit-defensible infrastructure deployment across enterprise environments supporting **25+ microservices**.
- Developed **secure production code** in **Python** and **Java Spring Boot** with **multiple code review cycles**; architected REST APIs and backend services with **authentication (IAM, OIDC, SAML)** and **data protection controls** aligned to **GDPR and regulatory compliance** requirements in banking/payments domain.
- Executed **vulnerability assessments, penetration testing, and threat modelling** on enterprise applications and external-facing integrations; identified and remediated **security vulnerabilities** via **discovery and threat scenario analysis**, reducing exposure risk by **40%** through continuous security protocol evolution.
- Minimized security vulnerabilities by implementing **Data Analytics AWS services (Redshift, Lake Formation)** and **SaaS Data Platforms (Snowflake, Databricks)** for encrypted data pipelines, audit logging, and **tamper-proof audit trails**; designed **data warehousing architectures** with enterprise-grade security controls and governance.
- Collaborated with **stakeholders and business leaders** across payments operations, compliance, and finance to understand **security needs** and recommend **business modifications** during vulnerability windows; conducted **UAT and post-implementation security validation** across interconnected enterprise systems with **change-control management**.
- Developed **creative security solutions** leveraging **Python automation, SQL (PostgreSQL, Oracle, MySQL)**, and **Linux shell scripting** to build **security monitoring dashboards** using **Splunk and Dynatrace**; engineered **data pipelines and ETL workflows** for real-time threat detection and compliance reporting across **SLA-critical, P1/P2 incident response** environments.

SKILLS

Cloud & Infrastructure Security – AWS (EC2, S3, Lambda, CloudWatch, Redshift, Lake Formation), CloudFormation, Terraform, Infrastructure as Code, IAM, Authentication, OIDC, SAML, encryption, audit logging.

Secure Software Development – Python, Java Spring Boot, REST APIs, secure coding practices, code review, tamper-proof architecture, audit-defensible design patterns, regulatory compliance (GDPR, PSD2).

Data Security & Analytics – Snowflake, Databricks, data warehousing, data modelling, Redshift, Lake Formation, encrypted pipelines, audit trails, Power BI, Tableau, DAX, Power Query.

Cybersecurity & Threat Management – vulnerability assessment, penetration testing, threat modelling, threat scenario analysis, discovery methods, security vulnerability identification, security protocol evolution.

Enterprise & Payments Domain – SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA, cross-border payments, payments processing, PSD2, open banking, ERP integration, change management, business systems architecture.

DevOps & Monitoring – CI/CD (Jenkins, Git), Docker, Linux, Splunk, Dynatrace, monitoring dashboards, operational alerting, SLA management, P1/P2 incident response.

Data Engineering & Analytics – SQL (PostgreSQL, Oracle, MySQL), pandas, NumPy, scikit-learn, ETL, data pipelines, statistical analysis, machine learning, business intelligence.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Banking Payments & Security Operations Dashboard (HCL Technologies)

- Architected and maintained a **secure SWIFT messaging and payments-operations dashboard** supporting a **Tier-1 banking client**; implemented **tamper-proof audit logging** and **GDPR-compliant data protection controls** for **ISO 20022 message flows, SEPA, and cross-border payment processing**.
- Designed **threat modelling and vulnerability assessment workflows** for external payment integrations and internal banking systems; identified **15+ critical security vulnerabilities** through **penetration testing and discovery methods**, executing remediation across **production SLA-critical environments**.
- Developed **secure Python automation scripts** and **SQL data pipelines** for encrypted reconciliation workflows, transaction-flow visibility, and **audit-defensible compliance reporting**; built **Splunk and Dynatrace security dashboards** for real-time operational alerting and **P1/P2 incident response** with **regulatory audit trail retention**.

Cloud-Native Security Analytics & Threat Detection Platform (Personal Project)

- Engineered an end-to-end **secure cloud-native application** orchestrating **AWS Lambda, CloudFormation, and API integrations** for automated security intelligence workflows; implemented **IAM authentication and encryption controls** for data-in-transit and data-at-rest compliance.
- Developed **Python-based data pipeline automation** using **Anthropic Claude API** for intelligent threat scenario analysis and security recommendation generation; designed **JSON-structured security validation schemas** and **constraint guardrails** to ensure tamper-proof, audit-defensible output.
- Built **data analytics and reporting infrastructure** with **structured-JSON threat modelling outputs** published to **GitHub Actions CI/CD** and cloud deployment via **Vercel**; created **creative security solutions** combining prompt engineering, API orchestration, and automated compliance documentation for enterprise-grade asset protection.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
