PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and implemented **data integration pipelines** using **AWS Glue, Lambda, and S3** to extract, transform, and load financial transaction data from disparate banking systems into a centralized data warehouse, reducing ETL runtime by **40%** and enabling real-time operational reporting across **SWIFT MT/MX message flows** and ISO 20022 payment streams.
- Built **PySpark and Scala-based distributed data pipelines** on **Apache Spark** to process **multi-terabyte payment datasets**, optimizing **Parquet and Delta Table** schemas for high-performance querying via **Athena and Databricks**, achieving **3x query latency reduction** for operational analytics dashboards.
- Automated **Infrastructure as Code (Terraform/CloudFormation)** deployments for data lake and warehouse infrastructure across **AWS EMR, S3, RDS, and DynamoDB**, integrating with **Jenkins CI/CD pipelines, Git, Maven, and Artifactory** to enable rapid, reproducible cloud deployments for cross-functional product teams.
- Orchestrated end-to-end **data warehousing and data modeling** initiatives aligned with business intelligence requirements, designing normalized and dimensional data models to support analytics dashboards built in **Power BI and Tableau** for executive stakeholder consumption and regulatory compliance reporting.
- Collaborated with remote and geographically distributed teams including **Product Management, Integration Engineering, Quality Engineering, and System Admin teams** to translate complex data requirements into scalable, high-performance distributed services; provided technical troubleshooting and problem-solving expertise across interconnected ERP, payments, and enterprise business systems.
- Applied **AI-assisted developer productivity tools** including **GitHub Copilot** to accelerate development, testing, and remediation workflows; leveraged **prompt engineering techniques** to optimize code generation and reduce defect resolution time by **35%** across data integration and Java Spring Boot microservice deployments.

SKILLS

Data Integration & ETL – AWS Glue, Lambda, Apache Airflow, Spark, PySpark, Scala, data extraction and transformation, distributed data pipelines, data acquisition solutions.

Data Warehousing & Analytics – Data warehousing architecture, data lake design, data modeling, dimensional modeling, Databricks, Athena, RDS, Parquet, Delta Tables, ORC, Avro, Sequence files.

AWS Data & Cloud Services – EMR, S3, Lambda, CloudWatch, EC2, RDS, DynamoDB, AWS Glue, Databricks, Infrastructure as Code (Terraform, CloudFormation).

CI/CD & DevOps – Jenkins pipelines, Git, Maven, Artifactory, Yaml configuration, CloudFormation, Terraform, GitHub Actions, code reviews, change-control management.

Programming & APIs – Python, Java, Spring Boot, REST APIs, open-source standards, SQL (PostgreSQL, MySQL, Oracle), NoSQL (DynamoDB), Flask, FastAPI.

Business Intelligence & Data Visualization – Power BI, Tableau, DAX, Power Query, data modeling, dashboard development, BI integration design.

AI & Developer Productivity – GitHub Copilot, Claude API, prompt engineering, AI-assisted development, workflow automation, LLM integration.

EDUCATION AND TRAINING

PROJECTS

Workforce Data Integration & Analytics Platform (HCL Technologies)

- Engineered end-to-end **data integration and data analysis** solution ingesting HR and workforce operational data from multiple disparate legacy systems and cloud sources using **AWS Glue, EMR, and Airflow** orchestration; built **PySpark transformations** on **Spark** clusters to standardize and curate **multi-petabyte datasets** into a centralized **data lake** stored in **S3 with Parquet and Delta Table formats**.
- Implemented **Infrastructure as Code (Terraform)** templates to provision and manage **AWS EMR clusters, Glue jobs, Lambda functions, RDS, and DynamoDB** infrastructure; integrated provisioning with **Jenkins CI/CD pipelines and Artifactory** to enable automated, repeatable cloud deployments across development, staging, and production environments.
- Designed **data warehouse schema** and **data modeling** strategy to support business intelligence integration; built **Power BI and Tableau dashboards** with complex **DAX measures and Power Query ETL** to provide stakeholders with real-time insights into workforce metrics, employee lifecycle data, and cross-system reconciliation workflows for compliance and audit reporting.

AI-Driven Resume Tailoring & Workflow Automation (Personal Project)

- Architected and deployed full-stack **AI workflow automation** leveraging **Claude API (Anthropic SDK)** with advanced **prompt engineering** and structured JSON constraint guardrails to generate job-description-tailored resume content at scale, integrating **Apify web scrapers** for automated JD ingestion and **reportlab PDF generation** for document rendering.
- Orchestrated end-to-end **data pipeline** combining web scraping, API integration, data transformation, and cloud deployment: ingested job descriptions → processed via Claude LLM → generated tailored resume content → rendered PDFs → deployed via **GitHub Actions CI/CD** to **Vercel**, demonstrating hands-on mastery of **data acquisition solutions, API integration, and scalable cloud automation**.
- Demonstrated **AI-assisted developer productivity techniques** including prompt engineering optimization, API workflow design, and iterative LLM-powered content generation; published project on GitHub with production-ready CI/CD pipelines, showcasing applied experience in building extensible, intelligent data-driven solutions aligned with modern software engineering practices.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
