PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **Level 2/3 technical support** for enterprise Java/.NET applications across **Windows, Mac OS X, and Linux** environments, responding to phone, email, and ticketed requests with **95%+ first-contact resolution rate** and strict SLA adherence for P1/P2 incidents.
- Administered and troubleshoot **Active Directory, Single Sign-On (SSO) environments, LDAP, DNS servers, and authentication protocols** across hybrid on-premises and cloud infrastructure, supporting 500+ enterprise users and cross-functional deployment workflows.
- Configured and deployed **hybrid cloud environments** spanning **on-premises, AWS cloud (EC2, S3, Lambda), and hybrid architectures**; documented installation, setup, and post-deployment troubleshooting procedures for customer-facing technical teams and business stakeholders.
- Developed **Linux Shell and PowerShell** scripts for system administration, log analysis, and scheduled task automation; executed firewall rule configuration, DNS resolution troubleshooting, and network-level diagnostics across infrastructure change-control workflows.
- Escalated critical system issues to engineering, QA, and product teams; authored detailed technical incident documentation, root-cause analyses, and product improvement recommendations that informed release-cycle prioritization and post-implementation triage cycles.
- Collaborated with identity access management solutions including **Privileged Access Management (PAM)** environments; demonstrated ability to adapt to complex security frameworks, overcome technical objections, and communicate advanced access-control and authentication concepts to non-technical stakeholders and C-level leadership.

SKILLS

Systems Administration & Infrastructure – Mac OS X, Windows, Linux, Active Directory, Single Sign-On (SSO), LDAP, DNS servers, authentication protocols, firewalls, hybrid environments, on-premises/cloud/hybrid infrastructure.

Identity & Access Management – Privileged Access Management (PAM), Active Directory configuration, LDAP directory services, SSO integration, authentication protocols.

Scripting & Automation – Linux Shell, PowerShell, Python, Bash, cron jobs, system administration automation.

Cloud & Deployment – AWS (EC2, S3, Lambda, CloudWatch), Docker containerisation, hybrid cloud architecture, on-premises systems, installation and deployment procedures.

Technical Support & Incident Management – customer service, technical troubleshooting, SLA management, P1/P2 incident response, issue documentation, escalation protocols, post-implementation support.

Certifications & Education – Bachelor of Engineering (Computer Science), MSc Data Analytics, IELTS Academic Band 7/9, Full Stack Java Spring Boot & Angular, Web Development.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Enterprise SWIFT Payments & Operations Support (HCL Technologies)

- Provided **Level 2/3 technical support** for mission-critical **SWIFT messaging dashboard** serving a major financial institution; monitored transaction flows, payment-operations visibility, and system reliability across **hybrid on-premises and cloud infrastructure** with **99.9% uptime SLA**.
- Troubleshoot **authentication, access control, and Single Sign-On (SSO)** integration failures within **Active Directory and LDAP environments**; configured firewall rules and DNS server settings to restore payment-processing connectivity for regional operations teams.
- Administered **Privileged Access Management (PAM)** controls for regulatory-sensitive payment operations; documented system configurations, access-control procedures, and change-management workflows to support **GDPR compliance** and audit trail requirements across cross-border payment flows.

Enterprise Business Systems Deployment & Troubleshooting (HCL Technologies)

- Installed, configured, and deployed **ERP modules and enterprise business systems** across **Windows, Linux, and hybrid cloud environments**; provided post-deployment technical support and troubleshooting for end-users and system administrators across interconnected platforms.
- Developed **PowerShell and Linux Shell automation scripts** for system administration, user provisioning, and configuration management across **Active Directory and LDAP directory services**; reduced manual deployment tasks by **40%** through scriptable change-control procedures.
- Escalated critical system integration failures and access-management issues to engineering and product teams; communicated technical root causes and product improvement recommendations to non-technical business stakeholders, ensuring resolution within SLA windows and incorporation into product release cycles.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
