PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed, built, and tested **Java Spring Boot** microservices and **REST APIs** delivering core features across production MongoDB-adjacent database and application infrastructure, balancing feature delivery with stability and performance optimization.
- Identified, designed, tested, and supported new features in enterprise data systems by applying **data structures**, **algorithms**, and **software design** principles to solve complex technical challenges for end-users maintaining large-scale deployments.
- Led cross-functional software projects collaborating with product, infrastructure, and operations teams to create quality end-user features, from requirements gathering through UAT coordination and post-go-live support, improving user adoption by **40%**.
- Developed and maintained **Python** automation scripts, data pipelines, and ETL workflows for operational reporting and scheduled data processing, reducing manual operational overhead by **35%** and improving system reliability across interconnected data systems.
- Built and deployed applications using **C++**, **Java**, **Python**, and **JavaScript/Node.js**, writing comprehensive unit and integration tests, managing **Git** workflows and **CI/CD pipelines** via **Jenkins** to ensure code quality and rapid iteration cycles.
- Solved complex problems in production environments by analyzing **data structures** and system design tradeoffs, maintaining incident response SLAs and supporting users in understanding deployment health through **monitoring dashboards**, **CloudWatch**, and **Splunk** analytics.

SKILLS

Programming Languages – Java, Python, C++, JavaScript, Node.js, Go, Ruby.

Core Computer Science – Data structures, algorithms, software design, system design, problem-solving.

Backend & Database – Spring Boot, REST APIs, SQL, PostgreSQL, MySQL, Oracle, data modelling, schema design.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Git, Jenkins, CI/CD pipelines, Linux.

Data Engineering & Analytics – ETL, data pipelines, pandas, NumPy, scikit-learn, Power BI, Tableau, DAX.

Software Testing & Quality – Unit testing, integration testing, code reviews, Jira, Agile/Scrum methodologies.

Cross-Functional Collaboration – Requirements gathering, UAT coordination, stakeholder communication, technical documentation.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Payments Operations Dashboard (HCL Technologies)

- Designed and built a production-grade **data visualization platform** for a global banking client, enabling real-time monitoring and testing of payment message flows across **Java Spring Boot** backend and **PostgreSQL** database, serving as the primary tool for operations teams to understand system behavior.
- Implemented complex feature logic using **data structures** and **algorithms** to calculate transaction reconciliation, ISO 20022 message validation, and SEPA payment routing rules, improving operational accuracy by **98%** and reducing user manual verification time by **45%**.
- Collaborated with cross-functional teams including domain experts, business analysts, and regulators to design features balancing user needs with compliance and delivery timelines, supporting UAT cycles and post-go-live optimization across interconnected ERP and payment systems.

Ireland Jobs Tracker – AI-Powered Resume Automation (Personal Project)

- Architected and built an end-to-end **software system** orchestrating **Python**, **JavaScript/Node.js**, and **REST APIs** to design, build, and test an AI-powered feature that generates tailored resumes at scale using **Claude API** and prompt engineering, deployed on **Vercel** and **GitHub Actions** CI/CD.
- Applied **software design** principles including data flow optimization, API integration patterns, and error handling to solve the complex problem of aligning job descriptions with resume content, demonstrating mastery of interconnected systems and user-facing feature delivery.
- Wrote comprehensive test coverage and implemented robust error handling across data pipelines, API integrations, and frontend components; maintained code quality through **Git** workflows and automated deployment pipelines, shipping a production-grade feature used by **500+** users.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
