PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Led **Business Analysis & Reporting** initiatives across payment integrity operations, designing and maintaining **Power BI dashboards** and **Tableau visualizations** to track daily/weekly/monthly/annual KPIs, operational metrics, and financial performance against budget and forecasted targets for senior leadership and cross-functional stakeholders.
- Conducted comprehensive **operational analysis and forecasting** for payments processing workflows, leveraging **SQL** (PostgreSQL, Oracle, MySQL) and **Python** data pipelines to trend performance drivers, validate savings, and deliver ad-hoc client and operational reports with actionable insights and recommendations.
- Managed **production support and incident response** for enterprise payment systems using **Splunk, CloudWatch, and Dynatrace**, maintaining SLA compliance and operational reliability through real-time monitoring, P1/P2 triage, and data-driven root-cause analysis across interconnected systems.
- Partnered with Operations, Finance, and Partner Services teams to develop **data models, reporting frameworks, and ETL pipelines** using **Power Query** and **Python automation**, enabling rapid delivery of performance measurement systems and continuous improvement initiatives across coordination of benefits and payments operations.
- Supported **ERP integration** and **enterprise business systems** for large financial clients, managing change-control processes, UAT coordination, and post-go-live analysis across interconnected **REST APIs** and database-level data flows, ensuring regulatory compliance and operational continuity.
- Built and presented **forecasting models and trend analysis** using **statistical methods, hypothesis testing, and DAX measures** to quantify performance against KPIs, identify operational bottlenecks, and recommend process improvements; established dashboards that reduced manual reporting effort by **40%** and improved decision-making velocity for operations leadership.

SKILLS

Business Analysis & Reporting – Business Analysis, Operational Reporting, Performance Measurement, KPI Tracking, Forecasting, Trend Analysis, Ad-hoc Reporting, Results Analysis.

Data & Analytics Platforms – Power BI, Tableau, Power Query, DAX, Data Modelling, Data Warehousing, ETL Pipeline Development.

Data Engineering & Programming – Python, SQL (PostgreSQL, Oracle, MySQL), pandas, NumPy, scikit-learn, Statistical Analysis, Hypothesis Testing.

Operational & Production Support – Production Monitoring, Incident Response, SLA Management, Application Support, Splunk, CloudWatch, Dynatrace, Change Management.

Enterprise Systems & Integration – ERP Systems, REST API Integration, Database Design, Cross-system Data Flows, Finance Systems, UAT Coordination.

Technical Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Java Spring Boot, Docker, Linux, Git, Jenkins, CI/CD Pipelines, Jira, Confluence.

Domain Expertise – Payments Operations, Payment Integrity, Coordination of Benefits, Regulatory Compliance, GDPR, Audit Trail Management.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

Coordination of Benefits Operational Reporting Dashboard (HCL Technologies)

- Designed and developed **Power BI dashboards** for a major healthcare payments client's Coordination of Benefits operations team, consolidating real-time performance metrics across **daily/weekly/monthly/annual** reporting cycles and enabling stakeholders to track operational KPIs, savings validation targets, and budget performance.
- Built **ETL pipelines using Python and SQL** to ingest payment operations data from enterprise databases (PostgreSQL, Oracle), transform multi-source data feeds, and load into centralized data warehouse for **Power BI** dashboards and ad-hoc reporting; automated data refresh schedules using **Jenkins CI/CD**.
- Delivered **forecasting models and trend analysis** using **DAX measures and statistical methods** to quantify performance drivers, identify operational bottlenecks, and recommend process improvements; collaborated with Finance and Operations leadership to establish performance baselines and savings measurement frameworks.
- Reduced manual reporting effort by **40%** through automated **Power Query** transformations and **Tableau interactive visualizations**, enabling operations teams to self-serve performance insights and respond to KPI variances in real-time.

Enterprise Payment Systems Monitoring & Analysis (HCL Technologies)

- Led **production support and operational analysis** for enterprise payment integrity systems, establishing comprehensive **Splunk and CloudWatch** monitoring dashboards to track system performance, transaction processing SLAs, and incident metrics across interconnected platforms serving **100,000+** daily transactions.
- Conducted **root-cause analysis and trend analysis** on payment processing failures using **SQL** queries and **Python** data pipelines, identifying patterns in P1/P2 incidents and delivering actionable recommendations to Operations and Finance teams; documented findings in **Confluence** and presented to senior stakeholders.
- Managed **change-control and UAT coordination** for system configuration updates and regulatory compliance enhancements across ERP and payment systems, ensuring post-implementation performance validation and SLA adherence; collaborated with business analysts to translate requirements into operational metrics and reporting frameworks.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
