PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Provided technical support and system design guidance to sales teams, customers, installers, and consultants across enterprise applications; produced technically accurate quotations, specifications, and system proposals aligned with regulatory compliance and best-practice engineering standards.
- Reviewed technical drawings, project information, and system specifications to ensure suitability, compliance, and optimal performance; liaised with internal departments (service, commissioning, distribution, management) to coordinate pre-sales and post-sales technical queries and system commissioning workflows.
- Handled inbound technical calls and customer enquiries in a professional and methodical manner; took ownership of technical problems through to resolution using structured problem-solving and clear communication with both technical and non-technical audiences.
- Supported bespoke system design and technical training for internal teams and external stakeholders; produced and maintained technical support materials, documentation, and knowledge-base resources to enable consistent technical delivery across the organisation.
- Managed change-control procedures for system configuration updates and technical specifications; coordinated UAT and post-implementation support across interconnected systems and stakeholder groups with attention to accuracy and engineering best practice.
- Demonstrated strong technical mindset and willingness to learn emerging heating and renewable energy technologies; applied methodical, detail-oriented approach to technical problem-solving and long-term system performance optimisation.

SKILLS

Technical Support & Problem-Solving – technical problem-solving, system design guidance, technical enquiry management, customer support, pre-sales and post-sales technical support.

Engineering & Systems – heating systems, renewable energy systems, system selection, system design, technical specifications, system suitability assessment, engineering best practice.

Technical Communication – explaining technical information to technical and non-technical audiences, technical documentation, user guides, training materials, customer-facing communication.

Business & Process – change-control management, UAT coordination, quotation preparation, specification development, cross-functional liaison, requirements gathering.

Enterprise Systems & Integration – ERP systems, business-system support, REST API integrations, interconnected system management, database operations, data workflows.

Software & Tools – Jira, Confluence, Linux, shell scripting, Git, SQL (PostgreSQL, MySQL, Oracle), Python, Java Spring Boot.

Certifications & Education – IELTS Band 7, MSc Data Analytics (NCI), Bachelor of Engineering (Computer Science).

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

SWIFT Payments Operations & Technical Support Dashboard (HCL Technologies)

- Delivered technical support and system design guidance for a banking-domain SWIFT messaging and payments-operations dashboard serving a major financial-services client; advised on system suitability, technical specifications, and optimal configuration for payment-message workflows.
- Reviewed transaction-flow specifications and ISO 20022 message structure documentation; ensured system compliance with SEPA instant-payments standards, cross-border payment regulations, and financial-services audit and regulatory requirements (GDPR, data protection).
- Coordinated pre-sales and post-sales technical enquiries with banking-domain business analysts, operations teams, and compliance stakeholders; produced technically accurate system proposals and specifications for payments-processing environments where SLAs and regulatory accuracy are first-class concerns.

Enterprise Systems Integration & Change-Control Support (HCL Technologies)

- Provided technical support and change-control management for enterprise business systems and ERP integrations across interconnected platforms (PostgreSQL, Oracle, MySQL); ensured system configurations, data flows, and specifications met internal and regulatory compliance standards.
- Coordinated UAT and post-implementation support across multiple system environments; liaised with internal technical teams, business stakeholders, and external customers to manage technical queries, specification reviews, and system commissioning workflows.
- Produced technical documentation and maintained knowledge-base materials for internal teams and external stakeholders; communicated complex system integrations and configuration changes in clear, methodical language suitable for both technical and non-technical audiences.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
