PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Prepared technical sales quotations and site assessments for renewable energy installations by **analysing architectural drawings**, conducting on-site measurements, and calculating heat load requirements for boilers, heat pumps, radiators, and underfloor heating systems in compliance with building regulations and **SEAI DEAP software** standards.
- Maintained and grew sales prospect pipeline through **customer relationship management**, responding to technical queries via email, telephone, and in-person visits; followed up on **quoted jobs to maximise product uptake** and prepared invoices, statements, and payment/debtor tracking in **spreadsheet systems**.
- Specified, sized, and commissioned domestic **ventilation systems** and **heat recovery units** to meet building regulations and grant scheme compliance; troubleshoot and maintained **central vacuum units** and provided technical documentation and data sheets to on-site installation crews.
- Managed project workflows by updating **Kanban board** status, liaising with installation crews, clients, and trades to coordinate job scheduling, material procurement, and site logistics; escalated scheduling conflicts and potential problems to management for resolution.
- Oversaw **warehouse inventory management** and logistics operations, tracking materials entering and exiting stock, allocating inventory to jobs, and coordinating procurement of internationally sourced goods; verified receipt of all paid orders and managed supplier communications for damages, faults, and warranty claims.
- Administered timesheets, work dockets, and employee records; maintained **hardcopy and digital file systems**; relayed payroll and operational data to management and bookkeeping; handled customer service queries in an organised and efficient manner across all project lifecycle stages.

SKILLS

Technical Sales & Quotations – architectural drawing analysis, site measurement and assessment, heat load calculations, sales quotation preparation, prospect list management, technical query resolution, job follow-up.

Technical Support & Systems Specification – heat pump sizing, biomass boilers, solar thermal and PV systems, heating system components, heat recovery unit specification, domestic ventilation system commissioning, central vacuum unit troubleshooting and maintenance, SEAI DEAP software compliance.

Building Standards & Grant Schemes – building regulations compliance, SEAI grant scheme requirements, ISO 20022 alignment for interconnected systems, regulatory documentation and audit trails.

Project Management & Logistics – Kanban board management, job scheduling, installation crew coordination, client liaison, supplier and manufacturer relations, material allocation, inventory tracking, international procurement, warehouse management, GPS site location identification.

Administration & Data Management – timesheet and work docket review, spreadsheet record maintenance, data entry, file management, customer service, payment tracking, debtor management, invoice and statement preparation.

Business Systems & Tools – Microsoft Word, Excel, PowerPoint, digital and hardcopy file systems, spreadsheet modelling, customer relationship workflows.

Domain Knowledge – renewable energy products and portfolio, heat pump systems, biomass boilers and stoves, solar thermal and photovoltaic systems, heating and ventilation components, domestic plumbing components, grant scheme eligibility and compliance.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Renewable Energy Project Lifecycle Support (HCL Technologies)

- Managed end-to-end project workflows for renewable energy installations by analysing architectural drawings, performing on-site heat load calculations and measurements, and generating technical sales quotations compliant with **building regulations** and **SEAI DEAP software** requirements.
- Coordinated job scheduling across installation crews, clients, and trade partners via **Kanban board** status tracking; identified site GPS coordinates and ensured material availability on installation dates; escalated scheduling conflicts and logistics issues to management and field teams.
- Oversaw warehouse inventory allocation, tracked procurement of internationally sourced heating and ventilation components, verified order receipt, and managed supplier communications for product faults and warranty claims to ensure on-time job delivery.

Technical Support & Customer Service Operations (HCL Technologies)

- Provided technical support by sizing boilers, heat pumps, radiators, underfloor heating, and **heat recovery units** to meet building regulations and grant scheme compliance; specified **domestic ventilation systems**, troubleshoot and maintained central vacuum units, and generated data sheets and technical documentation for installation crews.
- Managed customer-facing technical queries via email, telephone, and on-site visits; maintained sales prospect relationships and followed up on quoted jobs to maximise product adoption; prepared sales invoices, statements, and payment tracking records.
- Administered employee timesheets, work dockets, and operational records; maintained **spreadsheet systems** and hardcopy files; relayed payroll and personnel issues to management and bookkeeping; handled customer service issues with organised and efficient resolution.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
