PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **Level Two technical support** to enterprise clients across **Java/Spring Boot applications, PostgreSQL/Oracle databases, and AWS cloud infrastructure**, diagnosing and resolving escalated hardware, software, and system issues with **99.2% first-contact resolution rate** and zero SLA breaches over 3.5 years.
- Owned technical health of assigned client environments through **proactive monitoring and maintenance** using **Splunk, CloudWatch, and Dynatrace**; conducted regular system checks, security patching, updates, and disaster recovery readiness testing to ensure operational uptime and client network stability.
- Managed full incident lifecycle for **P1/P2 production incidents** across banking and ERP environments, including **escalation to senior team members**, third-party provider coordination, case management, and client communication throughout resolution—reducing mean time to resolution by **18%**.
- Configured and deployed end-user devices including laptops, desktops, and IP-managed print devices; performed **software installation, patching, updates, and troubleshooting** across **Linux, Docker containers, and enterprise business systems**; liaised with managed print vendors for device integration and configuration.
- Documented IT environments, client configurations, and technical solutions within internal knowledge bases and **Jira/Confluence**; created client-specific documentation for system processes, IT policies, and best practices; contributed to training materials for onboarding new team members and standardizing support workflows.
- Participated in onboarding projects, system deployments, and data migrations for enterprise clients; assisted with UAT coordination, change-control management for system configuration updates, and post-implementation triage; conducted periodic account reviews and prepared IT performance reports for client stakeholder presentations.

SKILLS

Helpdesk & Technical Support – Level Two support, incident management, troubleshooting, escalation procedures, SLA management, client communication, ticketing systems.

Infrastructure & Systems – AWS (EC2, S3, Lambda, CloudWatch), Linux, Docker, system monitoring, security patching, disaster recovery readiness, configuration management.

Software & Databases – Java Spring Boot, Python, SQL (PostgreSQL, MySQL, Oracle), REST APIs, software installation, updates, application support.

Monitoring & Observability – Splunk, CloudWatch, Dynatrace, automated alerts, system health checks, operational reporting.

Documentation & Knowledge Management – Jira, Confluence, knowledge base development, client documentation, IT environment configuration records, user guides.

Project & Client Management – UAT support, change-control management, onboarding projects, account reviews, stakeholder reporting, cross-functional collaboration.

Domain Expertise – ERP integration support, banking/payments systems, SWIFT messaging, ISO 20022 message flows, SEPA payments, regulatory compliance (GDPR), enterprise business systems.

EDUCATION AND TRAINING

PROJECTS

Banking Payments Operations Dashboard & Production Support (HCL Technologies)

- Delivered **Level Two technical support** and **proactive monitoring** for a **SWIFT messaging and payments-operations dashboard** serving a banking client; owned technical health of payment-message infrastructure through **Splunk, CloudWatch, and Dynatrace** monitoring, ensuring transaction-flow visibility and **99.5% SLA compliance**.
- Managed escalated P1/P2 incidents across payments processing systems, coordinating with banking operations teams and senior engineers; documented solutions in knowledge base and Confluence, created client-specific technical guides for payment workflows, **ISO 20022 message flows**, and **SEPA/cross-border payment** operational procedures.
- Conducted regular system checks, security updates, and disaster recovery testing for payments infrastructure; gathered client requirements and feedback during periodic account reviews; prepared IT performance reports on payment-system uptime and incident metrics for regulatory and client stakeholder presentations.

Enterprise ERP & Business Systems Integration Support (HCL Technologies)

- Provided technical support and **system configuration management** for enterprise ERP modules and interconnected business systems; performed **software installation, patching, and updates** across production and staging environments; coordinated **change-control procedures** and UAT testing for system configuration changes affecting banking and financial-services clients.
- Documented client IT environments, ERP system configurations, and integration points via REST APIs and database-level data flows across **PostgreSQL, Oracle, and MySQL**; created internal knowledge base articles and Confluence guides for ERP support workflows, onboarding procedures, and best practices.
- Assisted with onboarding projects and data migrations across interconnected ERP and enterprise systems; participated in incident response for cross-system issues, escalating complex integration problems to senior architects while maintaining client communication and coordinating with third-party ERP vendors.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
