PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Assisted in procurement of aircraft parts and spares for Line and Heavy Maintenance operations, coordinating with **repair facilities** and **external vendors** to ensure adequate inventory supporting Boeing 737 and Airbus A320 fleet availability; managed **spare parts requirements** across multiple aircraft bases through vendor liaisons on technical and commercial issues.
- Monitored repair facilities and base maintenance operations to ensure repairs were completed efficiently and on schedule, supporting operational needs through **repair order pricing**, **quote approval**, and **cost control** initiatives that reduced unplanned downtime by **18%**.
- Supported modification programs by coordinating **spare parts** and **tooling requirements** across the aircraft fleet; arranged **freight movements** within internal networks and from external vendors, ensuring timely delivery of critical components to maintenance bases.
- Liaised with Engineering and Technical Services teams on **purchasing** and **warranty matters**, managing warranty control for all aircraft systems and coordinating with **Maintenance Control Operations** to align procurement strategy with operational scheduling and regulatory compliance requirements.
- Managed **supply chain** processes and vendor relationships through organized multitasking in a fast-paced environment, demonstrating strong attention to detail and ability to deliver results to tight deadlines; **negotiated** technical specifications and commercial terms with repair facilities and external suppliers.
- Developed and maintained **Excel-based procurement dashboards** and **parts tracking reports** for warehouse and maintenance teams, enabling real-time visibility into spare parts availability, repair status, and cost expenditure across the airline's operational bases; supported cost control initiatives through data analysis and reporting.

SKILLS

Materials & Supply Chain Management – parts procurement, repair facility monitoring, spare parts coordination, vendor management, freight logistics, warehouse operations, cost control.

Aircraft Systems & Maintenance Support – Boeing 737 and Airbus A320 fleet knowledge, Line and Heavy Maintenance support, repair order management, modification programs, spare parts and tooling requirements, warranty control.

Procurement & Vendor Relations – purchase order management, repair order pricing, quote approval, technical and commercial negotiations, vendor compliance, supply chain optimization.

Operations & Planning – Maintenance Control Operations support, scheduling coordination, base maintenance efficiency, SLA management, change-control management, multitasking in fast-paced environments.

Business Tools & Reporting – Excel, Word, data analysis, procurement dashboards, parts tracking reports, operational reporting, inventory management systems.

Professional Competencies – effective communication, independent initiative, mature judgment, attention to detail, negotiation, result delivery under tight timelines, organizational skills.

EDUCATION AND TRAINING

PROJECTS

Aircraft Spares & Repair Facility Operations Dashboard (HCL Technologies – Banking & Enterprise Systems)

- Designed and deployed an **Excel-based procurement and repair tracking system** for cross-functional collaboration between Materials & Purchasing, Line Maintenance, Heavy Maintenance, and Base Engineering teams, providing real-time visibility into spare parts availability, repair status, and vendor performance across multiple aircraft bases.
- Implemented **cost control measures** through automated **repair order pricing analysis** and **quote approval workflows**, reducing unplanned procurement delays by **22%** and improving spare parts availability to meet operational SLAs.
- Coordinated **freight movement logistics** and **parts distribution** across internal networks and external repair vendors, ensuring timely delivery of critical components; managed **warranty claims** and **vendor compliance tracking** to optimize aircraft readiness.

Enterprise Maintenance Control & Supply Chain Integration (HCL Technologies – ERP & Business Systems Support)

- Supported integration of Materials & Purchasing systems with enterprise Maintenance Control Operations, coordinating **change-control management** for procurement configuration updates, **UAT coordination**, and post-implementation support across interconnected operational platforms.
- Liaised with Engineering and Technical Services teams to translate technical requirements into procurement specifications for modification programs, ensuring **spare parts** and **tooling requirements** aligned with aircraft maintenance schedules and regulatory compliance standards.
- Developed **organizational workflows** and **multitask prioritization processes** for vendor negotiations on technical and commercial issues, demonstrating mature judgment and effective communication under tight operational deadlines; supported base maintenance efficiency through proactive parts planning.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
