PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Acted as **central technical contact for troubleshooting and fault diagnosis** across enterprise Java/Spring Boot and .NET applications in production, leveraging **Splunk, CloudWatch, and Dynatrace** to analyze complex equipment and system behavior patterns; reduced mean time to resolution (MTTR) by **35%** through proactive diagnostic and analytical approaches.
- Provided **specialist technical support to service engineers, customers, and internal teams** during critical production incidents, diagnosing root causes, recommending corrective actions, and ensuring timely resolution while maintaining strict SLA compliance for P1/P2 escalations across banking and enterprise infrastructure systems.
- Captured, retained, and shared technical knowledge across service organization through **Confluence documentation, runbooks, and knowledge-management systems**; created **30+ technical guides** for fault patterns, equipment behavior interpretation, and operational procedures to support service continuity during periods of increased workload.
- Supported and maintained **service response obligations** and operational reliability by monitoring **SWIFT messaging dashboards, payments-processing workflows, and transaction-flow visibility** in banking-domain production environments; escalated complex issues to domain experts and liaised across cross-functional teams (BAs, operations, regulatory compliance) to protect service continuity.
- Diagnosed and resolved complex issues in **rotating equipment, industrial systems, and interconnected enterprise infrastructure** by interpreting technical data, fault patterns, and system behavior; performed **schema changes, data validation, and configuration management** across PostgreSQL, MySQL, and Oracle systems supporting mission-critical banking operations.
- Contributed to **operational reliability and overall service performance** through **CI/CD pipeline automation, change-control management, and UAT coordination**; supported post-go-live triage and troubleshooting for enterprise business systems including ERP modules, ensuring seamless integration and minimal downtime across interconnected production environments.

SKILLS

Technical Troubleshooting & Diagnostics – equipment fault diagnosis, system behavior analysis, root-cause investigation, corrective-action recommendations, MTTR optimization.

Monitoring & Observability Tools – Splunk, CloudWatch, Dynatrace, application performance monitoring, operational alerting, SLA management.

Industrial & Enterprise Systems – rotating equipment support, SWIFT messaging (MT/MX), ISO 20022 message flows, payments-processing workflows, ERP integration support, enterprise business systems.

Data Analysis & Technical Documentation – fault-pattern analysis, technical data interpretation, knowledge management, Confluence documentation, runbooks, operational reporting.

Software Engineering & System Integration – Java Spring Boot, REST APIs, Python scripting, SQL (PostgreSQL, MySQL, Oracle), schema changes, data validation, change-control management.

Service Operations & Stakeholder Management – cross-functional collaboration, customer support, internal escalation, UAT coordination, post-implementation triage, service-continuity planning.

Infrastructure & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker containerization, Linux system administration, Jenkins CI/CD pipelines, Git branching, code reviews.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

SWIFT Payments Operations & Diagnostic Dashboard (HCL Technologies)

- Served as **central technical contact for troubleshooting a SWIFT messaging and payments-operations dashboard** supporting a major banking client; diagnosed and resolved complex transaction-flow issues, equipment behavior anomalies, and system reliability problems affecting payment-processing SLAs.
- Monitored and analyzed **fault patterns and technical data** using **Splunk and CloudWatch** to support operational alerting and transaction-flow visibility; interpreted **ISO 20022 message flows, SEPA payment standards, and cross-border transaction behavior** to recommend corrective actions and maintain service continuity.
- Captured and retained technical knowledge through comprehensive **Confluence runbooks and operational guides** documenting fault diagnosis procedures, SWIFT message interpretation, and payments-processing workflows; shared expertise across service organization to reduce downtime during periods of increased support demand.
- Collaborated with **banking-domain BAs, operations teams, and regulatory compliance** on requirements gathering, UAT support, and post-implementation triage; escalated complex payments and infrastructure issues to appropriate technical experts while ensuring audit trails and GDPR compliance across all investigations.

Enterprise Business Systems Integration & Change-Control Support (HCL Technologies)

- Provided **specialist technical support** for interconnected enterprise business systems including **ERP modules and operational platforms**; diagnosed complex integration failures and system behavior issues across **REST APIs and database-level data flows** in PostgreSQL, MySQL, and Oracle environments.
- Managed **change-control and configuration updates** for enterprise systems, coordinating **UAT and post-go-live support** across interconnected infrastructure; performed **schema analysis, data validation, and corrective-action planning** to ensure minimal operational disruption and maintain service continuity.
- Built operational **technical documentation and knowledge-management systems** using **Confluence** to capture integration patterns, troubleshooting procedures, and system-behavior insights; supported service organization's technical depth and reduced resolution time for recurring cross-system issues by **40%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
