PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and maintained **scalable distributed systems** handling high-volume transaction processing for enterprise banking clients at HCL Technologies, implementing **robust routing, validation, and authentication logic** across interconnected microservices and payment-operations platforms.
- Engineered **REST API integrations** and **service-to-service communication layers** using **Java Spring Boot**, designing stateless, fault-tolerant services that processed 10,000+ financial messages daily with **99.95% uptime SLA compliance**.
- Built and optimized **production monitoring and alerting systems** using **Splunk, CloudWatch, and Dynatrace**, implementing real-time operational dashboards for critical API gateway functions and transaction-flow visibility, reducing incident response time by **35%**.
- Diagnosed and resolved **production issues** in complex, multi-tier distributed systems through **log analysis, database query optimization, and cross-system debugging**, participating in **on-call support rotations** for enterprise payment-processing pipelines.
- Contributed to **highly scalable and resilient distributed architecture** by implementing **CI/CD pipelines using Jenkins, Git branching strategies, and automated testing frameworks**, ensuring clean, well-documented, and testable code across shared microservices.
- Collaborated with multi-functional teams including domain architects, operations, and business stakeholders on **system reliability, performance optimization, and knowledge-sharing sessions**, supporting UAT coordination and post-go-live triage for mission-critical integration services.

SKILLS

Distributed Systems & API Gateway Development – Scala, Akka HTTP, Akka Streams, distributed system architecture, service-oriented design, stateless microservices, fault tolerance, resilience patterns.

Backend & Application Development – Java, Spring Boot, REST API development, service integration, routing logic, validation frameworks, authentication mechanisms, transformation logic.

Production Support & Reliability Engineering – Production monitoring, incident diagnosis and resolution, on-call support, SLA management, operational alerting, log analysis, performance optimization, system resilience.

Data & Integration Technologies – PostgreSQL, MySQL, Oracle, SQL query optimization, schema design, data pipelines, ETL workflows, API integrations, cross-system data flows.

Cloud Infrastructure & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, containerisation, Jenkins, Git, CI/CD pipelines, automated testing, Linux, shell scripting.

Monitoring & Observability – Splunk, Dynatrace, CloudWatch, operational dashboards, real-time alerting, metrics aggregation, performance tracking, system observability.

Domain Expertise – Enterprise integration, payments processing, SWIFT messaging, ISO 20022 message flows, SEPA protocols, financial services compliance, change-management, cross-functional collaboration.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

High-Volume Payments Operations Gateway (HCL Technologies)

- Designed and implemented **scalable API gateway services** serving as the critical entry point for **SWIFT MT/MX message routing and validation**, processing 10,000+ cross-border payment transactions daily with **sub-millisecond latency** and **99.95% availability**.
- Engineered **robust routing, validation, and authentication logic** to enforce financial regulatory compliance and ensure secure, reliable communication across interconnected payment systems, supporting SEPA instant payments and ISO 20022 message flows.
- Built **real-time operational dashboards using Splunk and Dynatrace** providing transaction-flow visibility, performance metrics, and automated alerting for P1/P2 incident detection, reducing mean-time-to-resolution by **40%**.
- Participated in **code reviews and knowledge-sharing sessions** with distributed teams across Dublin, USA, and India, ensuring clean, well-documented, and testable code adhering to enterprise reliability standards and microservice best practices.

Enterprise System Integration & Distributed Architecture Support (HCL Technologies)

- Contributed to development of **highly scalable and resilient distributed systems** integrating multiple enterprise business systems and ERP platforms, implementing **stateless service design patterns** and **fault-tolerant communication layers** to handle significant traffic volumes.
- Implemented **CI/CD pipelines using Jenkins and Git**, automating deployment, testing, and monitoring workflows for multi-service architectures, improving deployment frequency by **50%** and reducing production incidents by **25%**.
- Diagnosed and resolved **production issues** across interconnected distributed systems through systematic debugging, database optimization, and log analysis using **CloudWatch, Splunk, and Linux shell scripting**, maintaining **99.9% system reliability**.
- Collaborated with multi-functional teams on **improving efficiency and reliability of services**, leading UAT coordination, change-control management, and post-implementation support for mission-critical enterprise integrations serving financial-services clients.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
