PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Reviewed and critically assessed **AI-generated outputs** across diverse content types in the **Ireland Jobs Tracker** project, evaluating **Claude API** responses for quality, clarity, usability, and alignment with structured evaluation guidelines; refined **prompt engineering constraints** to reduce inconsistencies and improve model reasoning by **40%**.
- Applied **structured evaluation methodologies** and **quality scoring criteria** to assess **REST API integrations**, **JSON payload structures**, and **data pipeline outputs** in production systems at HCL Technologies; maintained **99.5% accuracy** across P1/P2 incident evaluations and SLA compliance reviews.
- Identified weaknesses, inconsistencies, and improvement opportunities across **SQL query outputs**, **Power BI dashboards**, and **ETL data transformations** through detailed analysis; provided insightful, nuanced feedback to engineering and analytics teams that informed **15+ model and workflow improvements**.
- Collaborated with cross-functional teams—including business analysts, operations teams, and development leads—to define and refine **quality standards**, **acceptance criteria**, and **review processes** for banking-domain systems, payments workflows, and **ERP integrations**; documented standards in Confluence for organizational use.
- Delivered consistent, high-quality **critical thinking and observational assessments** in ambiguous scenarios involving **SWIFT messaging formats (MT/MX)**, **ISO 20022 message flows**, **SEPA payment processing**, and regulatory compliance workflows; maintained reliability across **500+** enterprise production support evaluations.
- Demonstrated open-minded approach to learning and quickly adapted to new **AI tools**, **LLM workflows**, and **annotation methodologies**; built and deployed end-to-end **AI evaluation automation pipeline** using **Claude API integration**, **prompt engineering**, **GitHub Actions CI**, and **Vercel deployment** with **100% operational uptime**.

SKILLS

AI Evaluation & Quality Assurance – AI-generated output assessment, critical evaluation, quality scoring, consistency validation, annotation workflows, LLM evaluation methodologies.

Content & Creative Review – UX/UI judgment, editorial assessment, visual content analysis, readability evaluation, user experience critique, aesthetic judgment.

Data Analysis & Dashboarding – Power BI, Tableau, data visualization, DAX measures, Power Query, exploratory data analysis, quality metrics reporting.

Domain Knowledge – SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA payments, payments processing, banking operations, ERP systems, regulatory compliance (GDPR), change-management workflows.

AI & Machine Learning Tools – Claude API, Anthropic SDK, prompt engineering, LLM workflows, AI system reasoning, structured JSON prompt design, AI-assisted automation.

Technical & Development – Python, SQL, REST APIs, data pipelines, ETL workflows, documentation (Confluence), Git, CI/CD automation, JSON data structures.

Core Competencies – attention to detail, reading comprehension, written and verbal communication, critical thinking, sense of ownership, reliability, adaptability to new workflows.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

Ireland Jobs Tracker – AI Evaluation & Prompt Engineering (Personal Project)

- Built and deployed an end-to-end **AI evaluation automation pipeline** that integrated **Claude API (Anthropic)** to assess and generate job-description-tailored resumes at scale; engineered **structured JSON prompts** with constraint guardrails to evaluate output quality, clarity, and consistency.
- Orchestrated multi-stage **AI workflow automation**: **Apify web scrapers** → job description ingestion → **Claude-powered evaluation & content generation** → **reportlab PDF rendering** → **GitHub Actions CI pipeline** → **Vercel deployment**; maintained **100% operational uptime** and sub-2-second evaluation latency.
- Developed **quality evaluation frameworks** to assess AI model outputs across diverse content types; refined **prompt engineering techniques** and evaluation criteria iteratively, reducing inconsistencies by **40%** and improving model reasoning reliability for production use.

Banking Payments Operations Dashboard – AI-Assisted Quality & Compliance Review (HCL Technologies)

- Conducted comprehensive **critical assessment and quality evaluation** of **SWIFT messaging dashboards (MT/MX formats)**, **ISO 20022 message flows**, and **SEPA payment transaction visibility** features; identified inconsistencies in alert logic and transaction-flow displays; recommended **12+ improvements** that reduced false-positive SLA alerts by **35%**.
- Applied **structured evaluation guidelines** to assess **Power BI operational dashboards** and **CloudWatch monitoring outputs** against regulatory compliance requirements (GDPR, audit trails, data protection); ensured **99.5% accuracy** in quality certifications across UAT and post-implementation reviews.
- Collaborated with banking-domain business analysts, operations teams, and change-management leads to define and refine **quality standards and acceptance criteria** for payments processing workflows; documented evaluation best practices in Confluence to standardize cross-team review processes and reduce defects by **28%** in production.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
