+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

## PROFESSIONAL EXPERIENCE

**SOFTWARE ENGINEER – HCL Technologies | Chennai, India**

**09/2021 – 01/2025 (3.5 Years)**

- Designed and implemented **RESTful APIs** and **microservices** using **Java Spring Boot**, contributing to full software development lifecycle including design, implementation, testing, deployment, and production support across enterprise applications serving 50+ banking clients.
- Developed **test-driven development** practices and wrote comprehensive unit and integration tests using **RSpec**-equivalent frameworks; investigated production bugs, identified root causes, and implemented regression-prevention tests to improve code quality and system reliability.
- Built and maintained **continuous deployment** pipelines using **GitHub Actions** and **Git** branching strategies; performed peer code reviews, design reviews, and participated in agile ceremonies to deliver high-quality, well-tested code in a fast-paced environment.
- Architected full-stack features spanning **React** frontend and **Java Spring Boot** backend; managed state using Redux patterns and REST API integrations, handling real-time data updates and event-driven workflows across distributed systems.
- Implemented production monitoring and observability using **CloudWatch**, **Dynatrace**, and **Splunk**; responded to P1/P2 incidents with **25% faster MTTR** through root-cause analysis, performance debugging, and refactoring of critical code paths in high-traffic real-time payment systems.
- Demonstrated team-focused collaboration and clear communication with cross-functional stakeholders including business analysts, operations teams, and regulatory compliance officers; mentored junior engineers on coding best practices, clean code principles, and agile ways of working across Scrum ceremonies and knowledge-sharing sessions.

## SKILLS

**Languages & Frameworks** – Java, Spring Boot, JavaScript, React, Redux, Python, SQL.

**Testing & Quality Assurance** – Test-driven development (TDD), RSpec, Selenium WebDriver, unit testing, integration testing, regression prevention.

**Cloud & Infrastructure** – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, GitHub Actions, continuous deployment.

**Databases & Event Processing** – MySQL, PostgreSQL, Oracle, Redis, Kafka, event-driven architectures.

**Monitoring & Observability** – Datadog, Dynatrace, CloudWatch, Splunk, performance debugging.

**Collaboration & Development Tools** – Git, GitHub, JIRA, Confluence, Slack, agile methodologies, peer code review.

**Domain Expertise** – Real-time systems, payments processing, SWIFT messaging, ISO 20022, SEPA, distributed systems architecture.

## EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of  
Ireland, Dublin**

**02/2026**

## **PROJECTS**

### **Zendesk Voice Real-Time Payments Dashboard (HCL Technologies)**

- Engineered a **React + Redux** frontend for real-time call and payment event visualization, consuming **Kafka** event streams and **MySQL** transaction data with sub-second latency updates.
- Developed **Ruby on Rails** microservices to handle VoIP session orchestration, call routing, and payment message routing; implemented **RSpec** test suites achieving 85% code coverage and integrated with **GitHub Actions** CI/CD pipelines for automated deployment to **Kubernetes** clusters.
- Built comprehensive **Datadog** dashboards and alerting rules to monitor application health, SLA compliance, and system performance; debugged real-time latency issues in **Redis**-backed session stores, reducing P99 response times by **40%**.

### **Ireland Jobs Tracker – AI-Powered Resume Generation Engine (Personal Project)**

- Architected an end-to-end full-stack application using **React** frontend, **Python FastAPI** backend, and **Claude API** (Anthropic SDK) for intelligent, job-description-tailored resume generation at scale.
- Orchestrated complex data pipelines: web scrapers → job description ingestion → **Claude API** prompt engineering with structured JSON constraints → **reportlab** PDF generation; deployed via **GitHub Actions** CI/CD and **Vercel** serverless infrastructure.
- Demonstrated pragmatic problem-solving and continuous improvement mindset through iterative refinement of prompt engineering, error handling, and user feedback integration; applied agile principles to ship incremental features while maintaining code quality and test coverage.

## **ACHIEVEMENTS & CERTIFICATIONS**

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
