PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Acted as **liaison between business, IT, and QA teams** across **3.5 years** of enterprise support at HCL Technologies, ensuring alignment on payments domain requirements, technical dependencies, and solution delivery for a Tier-1 BFSI client managing **SWIFT messaging** and **payments-operations dashboards** in production.
- Translated **business requirement documents into technical specifications** for payments-related features, analysing **low and high value payments**, **cross-border payments**, and regulatory impacts including **SEPA**, **Instant Payments**, and **PSD2**; coordinated requirements gathering and analysis with functional BAs, product SMEs, and solution architects to define solutions aligned with client business objectives.
- Provided **content leadership and domain inputs** in **payments systems** across **ISO 20022 message flows**, **SWIFT MT/MX formats**, **EMV tokenization**, and **payment services architecture**; worked with delivery and implementation teams to ensure proposed solutions met regulatory compliance requirements (**GDPR**, audit trails, SLA standards) and were technically sound.
- Oversaw and participated in **UAT coordination** and **post-implementation support** for payments and ERP integrations; resolved technical issues during development and go-live phases by liaising with technical teams to clarify requirements and validate that system implementations matched business specifications.
- Managed **production support and incident response** for enterprise payments systems using **Splunk**, **CloudWatch**, and **Dynatrace**; analysed **SQL (Oracle, PostgreSQL, MySQL)** databases and payment transaction flows to troubleshoot **P1/P2 incidents**, maintain SLAs, and ensure operational visibility across interconnected payments platforms.
- Executed **change-control management** for system configuration updates in **ERP and enterprise business systems**; coordinated UAT across **REST API integrations** and database-level data flows, provided technical guidance to business stakeholders during post-implementation triage, and documented regulatory and operational requirements using **Confluence**.

SKILLS

Payments Domain Expertise – SWIFT MT/MX messaging, ISO 20022 message flows, SEPA, Instant Payments, Single Euro Payments Area, PSD2, Open Banking, cross-border payments, low and high value payments, EMV tokenization, payment systems architecture, reconciliation workflows.

Banking & Regulatory Knowledge – Banking/BFSI domain, GDPR, data protection, audit trails, SLA management, regulatory compliance, SWIFT rulebooks, payment services regulations.

Business Analysis & Requirements – Business requirement translation to technical specifications, requirements gathering and analysis, as-is assessment, UAT coordination, cross-functional stakeholder alignment, solution definition.

Database & Technical Skills – SQL, Oracle, PostgreSQL, MySQL, database schema design, ad-hoc queries, data validation, microservice architecture, REST API integrations, scripting.

Production Support & Monitoring – Splunk, Dynatrace, CloudWatch, incident response, P1/P2 triage, SLA management, transaction flow visibility, operational alerting.

ERP & Enterprise Systems – ERP integration support, change-control management, system configuration, multi-system data flows, cross-system coordination.

Tools & Collaboration – Jira, Confluence, Git, Jenkins, AWS (EC2, S3, Lambda), Docker, Linux, Agile/Scrum.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

SWIFT Payments Operations Dashboard – Production Support & Domain Leadership (HCL Technologies)

- Served as **payments business analyst** and **production support SME** for a Tier-1 banking client's **SWIFT messaging** and payments-operations platform, providing **domain inputs** and **content leadership** on **ISO 20022 message flows**, **SEPA compliance**, and **PSD2 regulatory requirements**.
- Translated **business requirements** for **cross-border payments**, **instant payments**, and **low/high value payment processing** into technical specifications; coordinated **requirements gathering and analysis** with functional BAs, QA teams, and solution architects to ensure alignment on payments system functionality and regulatory controls.
- Oversaw **UAT coordination** and **post-implementation support**, resolving technical issues across **SWIFT MT/MX message formats**, **tokenization workflows**, and **transaction-flow visibility dashboards**; liaised between business stakeholders, IT teams, and QA to validate that payment system enhancements met compliance standards (**GDPR**, audit trail requirements, SLA commitments).
- Analysed **Oracle and PostgreSQL** databases to support payment reconciliation workflows, transaction validation, and data integrity checks; managed **production support incidents** using **Splunk and Dynatrace** monitoring to ensure payment message processing remained within SLA targets.

ERP Integration & Change-Control Management (HCL Technologies)

- Managed **change-control processes** for **ERP** and **enterprise business systems** integrations; coordinated requirements analysis and technical design reviews with functional BAs, product SMEs, and engineering teams to ensure **solution definitions** aligned with business objectives and system capabilities.
- Provided **domain inputs** and **content leadership** across multi-system **REST API integrations** and **database-level data flows** spanning **Oracle, PostgreSQL, and MySQL** platforms; ensured technical teams understood business requirements and that implementations met regulatory and operational standards.
- Led **UAT coordination** and **post-implementation triage** for ERP system configuration updates and cross-system data migrations; documented regulatory impacts, change specifications, and operational procedures using **Confluence** to support business stakeholders and technical teams.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
