HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** microservices for backend systems, ensuring **REST API** consistency and maintainability.
- Developed and optimized **Hibernate** queries and persistence layers, reducing database load by **18%** for critical enterprise applications.
- Engineered **Java EE** components and applied object-oriented design patterns to enhance system modularity and supportability, evidenced by a **22%** reduction in bug-fix turnaround time.
- Contributed to the design and architecture of new systems, focusing on **reliability and scaling** principles within distributed environments.
- Participated in **code reviews** and sprint planning sessions, providing technical estimations and ensuring adherence to agile methodologies.
- Managed and migrated data between **PostgreSQL** and **MySQL** databases, ensuring data integrity during system integrations and updates.
- Containerized backend services using **Docker** and deployed them to **AWS EC2** instances, improving deployment consistency and reducing setup time.

SKILLS

Languages – Java, Python, SQL, C++, Rust

Frameworks – Spring Boot, Hibernate, Java EE, NestJS, Flask, FastAPI

Databases – Valkey, Redis OSS, Memcached, PostgreSQL, MySQL, Oracle

Cloud – AWS (EC2, S3, Lambda, CloudWatch)

Tools – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

Concepts – Distributed Systems, In-memory Data Stores, Data Replication, Sharding, Scaling, System Design, Memory Management, Parallel Computing

PROJECTS

Distributed Caching Layer for High-Throughput Services

- Designed and implemented a **distributed caching layer** using **Redis OSS** to reduce latency for a high-volume transaction processing system.
- Engineered data replication strategies between multiple Redis nodes, ensuring **high availability** and fault tolerance for cached data.
- Optimized caching algorithms and query patterns, achieving average response times below **5ms** for frequently accessed data.

Scalable Data Migration Service (HCL Technologies)

- Developed a **Python**-based service to automate data migration between **PostgreSQL** and an enterprise data warehouse, processing approximately **1.5TB** of data.
- Implemented robust error handling and logging mechanisms, reducing data transfer failures by **30%** and improving operational oversight.
- Integrated the migration service with **Jenkins** for automated CI/CD pipelines, enabling scheduled and on-demand data synchronization tasks.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
