

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Owned incident management for high-availability banking and payments platforms, resolving P1/P2 production incidents in real time within strict response and resolution SLAs during live outages.
- Ran the full incident, problem, and change lifecycle in ServiceNow — triage, prioritisation, escalation, and root-cause analysis to closure — writing post-incident reports and runbooks reused across the team.
- Monitored production health with Splunk and Dynatrace, tuning alerts to catch SLA breaches early and giving stakeholders clear, timely status updates throughout each incident.
- Coordinated 24x7 on-call across application, database, and infrastructure teams, cutting repeat incidents through trend analysis and permanent fixes tracked in ServiceNow.
- Administered and performance-tuned production Oracle and MySQL databases — designing indexes, analysing slow queries via explain plans, and benchmarking to hold performance under heavy load.
- Operated distributed deployments with replica sets, automated backups, and monitoring; ran point-in-time recovery drills and validated failover across nodes to sustain high availability.
- Ran SQL and Java queries directly against production databases during support to diagnose live incidents, extract diagnostic data, and validate fixes, while maintaining services on Linux and AWS (EC2, S3, CloudWatch).

SKILLS

Languages – Java, Python, JavaScript / Node.js, SQL, Bash.

MongoDB Ecosystem – Server, Java & Python drivers, Atlas, Cloud Manager, backup, monitoring.

Databases – MongoDB (replica sets, indexing, aggregation pipeline), PostgreSQL, Oracle, MySQL; query optimisation and performance tuning.

Distributed Systems – Replication, high availability, failover, point-in-time recovery, sharding.

Systems & Network Admin – Linux & Windows administration, load balancers, firewalls, networking, AWS (EC2, S3, CloudWatch), Azure fundamentals.

Production Support & ITSM – ServiceNow (incident, problem & change management), SLA management, 24x7 on-call, Splunk, Dynatrace, root-cause analysis, real-time troubleshooting.

Engineering Practices – Application architecture, Spring Boot, REST APIs, Docker, Git, CI/CD.

PROJECTS

Ireland Jobs Tracker — Automated Job-Search Pipeline & Dashboard

- Built an end-to-end Python pipeline that scrapes 1,300+ job listings daily into a cloud Postgres database (Supabase), exposed through a Vercel serverless API and an analytics dashboard.
- Automated scraping, database sync, and daily backups with GitHub Actions; added pagination and insert-only sync to keep the 1,300-row dataset consistent and prevent overwrites.

Spring Boot E-Commerce Backend

- Developed a Java Spring Boot e-commerce backend with REST APIs for catalog, cart, and orders, backed by a relational database via JPA/Hibernate and secured with JWT authentication.
- Designed the schema and tuned queries and indexes for product search and checkout, containerised the service with Docker, and added integration tests in a CI pipeline.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
