## PROFESSIONAL EXPERIENCE — 3.5 YEARS

---

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and developed **Java Spring Boot** microservices for a core trading platform, implementing RESTful APIs to support new asset class functionalities.
- Engineered **Hibernate** ORM mappings and optimized SQL queries against **PostgreSQL**, reducing data retrieval times for trading positions by **22%**.
- Authored comprehensive unit and integration tests using **JUnit** and **Mockito**, achieving over **85%** code coverage for critical backend modules.
- Collaborated with product owners and business analysts to translate trading requirements into actionable technical specifications and user stories within an Agile framework.
- Participated in code reviews and mentored junior engineers on best practices for **Java** development and **Spring Boot** application design.
- Gained exposure to event-driven architectures by contributing to the integration of **JMS** message queues for asynchronous trade event processing.
- Containerized backend services using **Docker** and deployed them to **AWS EC2** instances, enabling more reliable and consistent application rollouts.

## SKILLS

---

**Languages** – Java, Python, SQL, R

**Frameworks/Libraries** – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

**Databases** – PostgreSQL, MySQL, Oracle

**Cloud Platforms** – AWS (EC2, S3, Lambda, CloudWatch)

**Tools & Technologies** – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau, FIX protocol

**Methodologies** – Agile, Scrum

## PROJECTS

---

### Equity Trading Platform Enhancement (HCL Technologies)

- Developed new **Java Spring Boot** RESTful services to integrate additional trading instruments into the existing platform, supporting a **15%** increase in asset class coverage.
- Implemented robust error handling and retry mechanisms using **JMS**, ensuring the reliable processing of over **5,000** trade-related messages daily.
- Collaborated with the QA team to define test cases and support User Acceptance Testing (UAT) for the newly developed trading capabilities.

### Transaction Reconciliation Service (HCL Technologies)

- Built a **Python**-based data pipeline to extract and transform transaction data from multiple **Oracle** and **PostgreSQL** databases.
- Designed and executed SQL queries to reconcile transaction records, identifying and flagging discrepancies for operational review, reducing manual reconciliation effort by **30%**.
- Automated the generation of daily reconciliation reports using Python scripting, delivered via email to business stakeholders.

## EDUCATION

---

**M.Sc. Data Analytics — National College of Ireland, Dublin**

Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India**

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
