

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** microservices for core platform features, focusing on RESTful API design and integration with relational databases.
- Developed and maintained **Hibernate** entities and JPQL queries for complex data persistence layers, ensuring data integrity and efficient retrieval across financial transactions.
- Wrote comprehensive unit and integration tests using **JUnit** and **Mockito**, achieving over 90% code coverage for critical Java application modules.
- Participated actively in **code reviews** and **pair programming** sessions, contributing to the team's adherence to secure coding practices and overall code quality.
- Triage product and system issues, performing **debugging** and **monitoring** using **Splunk** and **Dynatrace** to identify root causes and resolve production incidents within SLA targets.
- Researched and evaluated emerging technologies, conducting **Proof-of-Concepts** for potential integration into the existing platform architecture.
- Containerized **Java Spring Boot** applications using **Docker** and deployed them onto **AWS EC2** instances, managing configurations via **Jenkins** CI/CD pipelines.

SKILLS

Programming Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, Hibernate, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle, MongoDB, DynamoDB

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git, GitHub

Tools & Observability – Splunk, Dynatrace, Jira, Confluence, Maven, Gradle

Data & Analytics – Power BI, Tableau, DAX, Power Query, data modelling, data warehousing

APIs & Protocols – RESTful APIs, WebSockets, OpenAPI specification

PROJECTS

Real-Time Transaction Monitoring System (HCL Technologies)

- Developed a **Java Spring Boot** application to ingest and process high-volume financial transaction data streams, integrating with **PostgreSQL** for storage.
- Implemented asynchronous processing using message queues to ensure reliable event handling and built **RESTful APIs** for querying transaction status and audit trails.
- Designed a dashboard component that visualized key operational metrics, including transaction success rates and error patterns, for internal operations teams.

Automated Data Reconciliation Service (HCL Technologies)

- Engineered a **Python**-based service to automate the reconciliation of financial data across multiple enterprise systems, reducing manual effort by approximately 40%.
- Wrote **SQL** scripts to extract and transform data from source systems (**Oracle**, **MySQL**) and developed comparison logic to identify discrepancies.
- Integrated the service into the existing CI/CD pipeline using **Jenkins**, ensuring automated deployment and monitoring via **Splunk**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
