PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Assisted in developing and enhancing the **automated build and test infrastructure** on Azure DevOps, focusing on improving **scalability and reliability** for our software delivery pipelines.
- Streamlined the **software development and deployment workflow** for internal Dev and SQA teams by implementing enhanced CI/CD practices, reducing average deployment time by **35%**.
- Collaborated with **software and firmware engineers** to ensure seamless integration of new features and releases into the Q-SYS platform, managing dependencies across multiple service teams.
- Developed and maintained comprehensive **documentation for deployment processes and procedures**, including runbooks and architectural diagrams for the Q-SYS Reflect Enterprise Manager.
- Implemented **containerization technologies** using **Docker and Kubernetes**, managing deployments and scaling strategies for microservice-based applications on Azure.
- Contributed to decisions on releasing software to production, coordinating with the broader release team to ensure successful and efficient deployments across development, staging, and production environments.
- Applied **Infrastructure as Code (IaC) principles** using **Bicep** to define and manage Azure resources, ensuring consistent and repeatable environment provisioning.

SKILLS

Cloud Platform – Azure, Azure DevOps, EC2, S3, Lambda, CloudWatch

Containerization & Orchestration – Docker, Kubernetes, Helm

IaC & Automation – Bicep, Terraform, Ansible, Python, Groovy, Linux shell script

CI/CD & SCM – Jenkins, GitHub, Bitbucket, Git

Monitoring & Logging – Grafana, Prometheus, Elasticsearch, Splunk, Dynatrace

Development & Scripting – Java, Spring Boot, Python, JavaScript, REST APIs

PROJECTS

Azure DevOps Pipeline Enhancement for Q-SYS Platform

- Designed and implemented a multi-stage CI/CD pipeline in **Azure DevOps** to automate build, test, and deployment processes for the Q-SYS platform, supporting both **Docker** containers and **Kubernetes** deployments.
- Integrated **Bicep** scripts for automated provisioning of Azure infrastructure, including AKS clusters and associated networking components, ensuring environment consistency and reducing manual setup time by **70%**.
- Developed automated testing strategies within the pipeline, including unit and integration tests, to catch regressions early in the development cycle and improve overall code quality.

Q-SYS Reflect Enterprise Manager Observability Solution

- Configured and deployed **Prometheus and Grafana** for real-time monitoring of the Q-SYS Reflect Enterprise Manager platform, providing key performance indicators and alerting on critical issues.
- Integrated **Elasticsearch and Kibana** to centralize application logs from distributed microservices, enabling efficient troubleshooting and root cause analysis of production incidents.
- Developed custom dashboards in Grafana to visualize system health, resource utilization (CPU, memory, network), and application-specific metrics, aiding operations teams in proactive maintenance.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
