PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Represented Quality on product creation and sustaining project teams, ensuring adherence to **Design Control principles** across new product development and product/process changes.
- Developed and reviewed **risk management documentation**, including Risk Management Reports, Hazard Analyses, Risk-Benefit Analyses, and FMEAs, for software-enabled medical devices.
- Supported and led **failure investigations** and root cause analyses, contributing to CAPA processes and continuous improvement initiatives.
- Reviewed and approved **build specifications**, verification and validation procedures, software validation documentation, and test method validations.
- Ensured compliance with **build regulation**, risk management, and change control processes within a regulated medical technology environment.
- Promoted a strong quality culture within R&D; through training and mentorship on relevant requirements and guidelines, including **IEC 62304**.
- Containerised and deployed Java Spring Boot applications to **AWS EC2 instances** using Jenkins pipelines for CI/CD, managing artifact repositories and deployment strategies.

SKILLS

Quality Engineering – Software Quality Assurance, Design Control, Risk Management, FMEA, Hazard Analysis, CAPA, Software Validation, Test Method Validation, Build Assurance, Regulatory Compliance, ISO 13485, ISO 14971, FDA QSR (21 CFR Part 820), IEC 62304, IEC 62366

Software Development Lifecycle (SDLC) – New Product Development, Product Lifecycle Management, Agile Methodologies, Scrum, Design Verification, Design Validation, Software Reliability

Programming Languages – Java, Python, SQL

Frameworks & Technologies – Spring Boot, REST APIs, Hibernate, JPA, Docker, AWS (EC2, S3, Lambda, CloudWatch), Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, PostgreSQL, MySQL, Oracle

Data Analysis & BI – Power BI, Tableau, DAX, Power Query, Pandas, NumPy, R/RStudio, Statistical Analysis

General Skills – Analytical Skills, Problem-Solving, Communication, Presentation Skills, Collaboration, Continuous Improvement, Project Management

PROJECTS

Medical Device Software Validation Framework

- Developed a reusable Python framework to automate the generation and execution of **software validation protocols** for medical device components, reducing manual effort by an estimated **30%**.
- Integrated the framework with **Jenkins CI/CD pipelines** to enable automated testing and reporting within the development workflow, ensuring consistent build quality.
- Documented the framework's usage and best practices, creating a comprehensive guide for R&D; teams to ensure adherence to **IEC 62304** standards.

Enterprise Application Reliability Monitoring

- Engineered comprehensive monitoring solutions using **Splunk and Dynatrace** for a suite of Java Spring Boot enterprise applications, establishing critical performance metrics and alerting thresholds.
- Automated the response to common P1/P2 incidents through Python scripting, reducing mean time to resolution for recurring issues by approximately **22%**.
- Collaborated with operations teams to define and track SLAs, ensuring consistent system availability and performance for end-users.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
