PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Analyzed business processes and mapped requirements across interconnected systems for a financial services client, ensuring alignment between technical capabilities and operational needs.
- Translated business use cases into detailed product requirements for API-driven backend applications, focusing on data capture strategies and analytical tagging implementation.
- Documented complete data and application flows across enterprise platforms, identifying upstream and downstream integrations and dependencies to support system architecture understanding.
- Developed and maintained **Java Spring Boot** REST APIs for cross-service data exchange, implementing request validation and circuit-breaker patterns to enhance system resilience.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace**, responding to P1/P2 incidents and ensuring SLA adherence for critical financial operations.
- Automated data extraction and reporting tasks using **Python** scripts, processing approximately **5,000 records daily** to support operational analytics and reconciliation workflows.
- Containerized **Java** applications using **Docker** and deployed them to **AWS EC2** instances, managing build pipelines with **Jenkins** for consistent release cycles.

SKILLS

Core Competencies – API Design, System Integrations, Business Analysis, Requirements Gathering, Process Mapping, Data Capture Strategies, Analytical Tagging, End-to-End System Architecture

Backend Development – Java, Spring Boot, REST APIs, Microservices, Hibernate, JPA, Python, Flask, FastAPI

Databases & Data Handling – SQL, PostgreSQL, MySQL, Oracle, Data Warehousing, ETL, Pandas, NumPy

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Monitoring & Observability – Splunk, Dynatrace, CloudWatch

BI & Analytics Tools – Power BI, Tableau, DAX, Power Query, R, RStudio

Project Management & Collaboration – Agile, Scrum, Jira, Confluence

PROJECTS

API Integration Framework for Enterprise Systems

- Designed and implemented a reusable **API integration framework** in **Java Spring Boot** to connect disparate enterprise systems, streamlining data exchange for reporting and operational dashboards.
- Developed comprehensive documentation for API endpoints, including request/response schemas and usage examples, facilitating quicker integration for downstream consumers and business analysts.
- Collaborated with business analysts to define integration requirements for a **payments operations dashboard**, ensuring seamless data flow for transaction monitoring and reconciliation.

Automated Data Validation and Reporting Pipeline

- Engineered a **Python**-based data pipeline to automate the extraction, transformation, and validation of daily transaction data from **PostgreSQL** and **MySQL** databases.
- Implemented automated checks and alerts for data anomalies, reducing manual data verification effort by an estimated **40%** and improving data quality for downstream analytics.
- Generated scheduled summary reports using **Pandas** and delivered them to operational teams, providing key insights into payment processing volumes and success rates.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
