HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented scalable enforcement workflows using **Python** and **SQL** to analyze high-volume product metadata and identify system gaps, improving threat vector detection by **15%**.
- Co-developed product protections by integrating **Generative AI** concepts with partner engineers, focusing on machine-readable policies and AI agent capabilities for monetization quality.
- Authored complex, efficient **SQL** queries to extract and analyze datasets for anti-abuse investigations, mapping abuse journeys and evaluating system performance.
- Performed deep-dive data analyses on controversial or offensive content to validate and enhance the precision and recall of applied **AI** protection systems.
- Translated complex technical concepts and data insights into actionable recommendations for leadership and cross-functional strategy alignment.
- Managed project priorities and technical resources across multiple adjacent technical projects, ensuring alignment on timelines spanning multiple quarters.
- Containerized Python-based data analysis services using **Docker** and deployed them to an **AWS** environment, enabling scalable data processing for trust and safety workflows.

SKILLS

Programming Languages – Python, SQL, Java, R, C++

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Data Analysis & ML – Machine Learning models, Generative AI, LLMs, scikit-learn, pandas, NumPy, R, statistical analysis, AI agents

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau, FastAPI, Flask

PROJECTS

Anti-Abuse Workflow Automation (HCL Technologies)

- Developed Python scripts to automate the ingestion and analysis of large product metadata sets, identifying patterns indicative of abuse with ~85% accuracy.
- Constructed complex SQL queries against relational databases to extract and validate transaction data for anti-abuse investigations, flagging suspicious activities.
- Implemented automated alerting mechanisms based on data analysis findings, reducing manual review time for potential policy violations by **20%**.

Monetization Quality Analysis Dashboard (MSc Applied Project)

- Designed and built an interactive **Power BI** dashboard to visualize key performance indicators and potential abuse vectors within a simulated monetization ecosystem.
- Applied statistical analysis techniques and **DAX** measures to identify trends and anomalies in user behavior data, informing potential system improvements.
- Extracted and transformed data using **Power Query**, creating a robust data model to support trend analysis and stakeholder reporting.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
