PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Installed, maintained, and decommissioned **data center equipment** including cabinets, servers, storage, and associated cabling, adhering strictly to site procedures and safety protocols.
- Managed and troubleshot **routine infrastructure issues** across hardware, power, and connectivity, escalating complex problems to engineering teams while documenting resolutions in the **ticketing system**.
- Verified and labeled all **network cabling**, racks, and equipment, ensuring accurate inventory records and adherence to site standards for clear operational logging.
- Coordinated with **site operations** and other technical teams to complete installations, maintenance tasks, and resolve operational issues, ensuring consistent service delivery.
- Followed standard operating procedures, program policies, and **security requirements** to maintain a safe and efficient data center environment.
- Contributed to process improvement efforts by identifying opportunities in **operational efficiency**, quality, and documentation related to data center hardware management.
- Containerized and deployed backend services using **Docker** and **Kubernetes** on AWS, managing configurations and resource allocation for predictable rollouts.

SKILLS

Data Center Infrastructure – Hardware Installation, Cabling, Racking, Power Management, Cooling Systems, Fault Tolerance, Cable Routing

Networking – Copper Cabling, Fiber Optic Cabling, Networking Components, Connectivity Troubleshooting

Hardware & Tools – Server Installation, Storage Devices, Material Handling Equipment, Server Lifts, Pallet Jacks, Cable Testing Equipment

Operations & Support – Ticketing Systems, Incident Management, Troubleshooting, Documentation, Safety Policies, Security Requirements, Site Procedures

Cloud & Containerization – AWS, Docker, Kubernetes

General IT – Computer Hardware, Microsoft Office Suite, Outlook, Web Browsers

PROJECTS

Data Center Hardware Deployment and Cabling

- Executed the installation of **servers, storage arrays, and network switches** within enterprise data center racks, ensuring proper fit, power, and cooling configurations.
- Managed the complete lifecycle of **copper and fiber optic cabling**, including termination, testing with specialized equipment, and meticulous labeling according to industry standards for a large-scale deployment.
- Developed and documented **standard operating procedures** for equipment decommissioning and inventory updates, reducing data discrepancies by 15% across managed assets.

Cloud Infrastructure Automation with Docker and Kubernetes

- Containerized multiple backend services using **Docker**, building optimized images for efficient deployment and consistent runtime environments.
- Orchestrated container deployments on **Kubernetes (EKS)**, configuring deployments, services, and ingress controllers to manage application scaling and availability.
- Integrated **CI/CD pipelines** using Jenkins to automate the build, test, and deployment process for containerized applications, reducing manual deployment effort by 40%.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
