HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **RESTful APIs** and **web services** using **Java Spring Boot**, integrating with enterprise systems and supporting cross-service data exchange.
- Engineered **Python scripts** to automate data extraction and transformation processes, improving ETL pipeline efficiency for scheduled reporting tasks.
- Managed production environments for enterprise applications, responding to P1/P2 incidents and ensuring adherence to strict SLAs with **Splunk** and **Dynatrace**.
- Contributed to the design and development of secure, scalable enterprise applications using **.NET Core**, including **Web APIs** and integrations with **Azure** services.
- Participated in the development of AI-native application prototypes, focusing on translating initial concepts into functional minimum viable products.
- Implemented secure development practices and OWASP principles in application design, including basic understanding of **authentication** and **authorization** mechanisms like **OAuth2** and **JWT**.
- Containerized Java Spring Boot applications using **Docker** and deployed them to **AWS EC2** instances, configuring basic resource limits for predictable rollouts.

SKILLS

Backend Development – C#, .NET Core, .NET Framework, Java, Spring Boot, RESTful services, Web APIs

Frontend Development – Angular, React, Blazor, JavaScript, TypeScript

Databases – SQL Server, T-SQL, PostgreSQL, MySQL, Oracle

Cloud & DevOps – Azure, AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, CI/CD, Jenkins

Architecture & Principles – Clean Architecture, Software Design Principles, API Documentation, Swagger, OpenAPI

Security – Secure Development Practices, OWASP Principles, Authentication, Authorization, OAuth2, JWT, Azure AD

PROJECTS

Enterprise Java Backend Modernization

- Refactored legacy Java services into a modern **Spring Boot** microservices architecture, improving system resilience and maintainability.
- Developed **RESTful APIs** for core business logic, ensuring clear contracts and efficient data transfer between services using **JPA** with **PostgreSQL**.
- Implemented comprehensive unit and integration tests using **JUnit**, achieving over 85% code coverage for critical API endpoints.

Python Data Pipeline for Operational Reporting

- Designed and built an automated **Python** data pipeline to aggregate data from multiple sources, reducing manual reporting effort by approximately 18 hours per week.
- Applied **pandas** and **NumPy** for data transformation and cleaning, ensuring data accuracy for downstream analytical dashboards.
- Scheduled and monitored daily data loads using cron jobs on Linux environments, maintaining data freshness for business stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
