PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Served as the primary technical point of contact for penetration testing activities across the EMEA region, coordinating with external partners and internal teams for assessment delivery.
- Managed the full lifecycle of remediation actions for identified vulnerabilities, including documentation, tracking progress, and implementing process improvements to enhance security posture.
- Liaised directly with Governance teams to develop actionable insights from penetration test findings and drive subsequent security initiatives across EMEA operations.
- Facilitated hands-on penetration testing to identify security weaknesses, meticulously documenting findings and formulating detailed recommendations for mitigation.
- Contributed to vulnerability footing processes by analyzing threat landscapes and maintaining an up-to-date understanding of common attack vectors relevant to financial services.
- Developed and presented reports on penetration testing outcomes and recommendations to non-technical audiences across various EMEA subsidiaries, ensuring clear understanding of security risks.
- Containerized security assessment tooling using **Docker**, enabling consistent deployment and execution across diverse testing environments within the cloud infrastructure.

SKILLS

Cybersecurity – Penetration Testing, Vulnerability Assessment, Threat Analysis, Remediation, Security Reporting, Governance, Regulatory Compliance

Financial Services – DORA, Financial Institution Operations, EMEA Operations

Communication & Collaboration – Stakeholder Management, Presentation Skills, Cross-functional Collaboration, Third-Party Management

Technical Skills – Linux, Shell Scripting, Python, SQL, Jenkins, Git, AWS

Tools – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau

PROJECTS

EMEA Security Assessment Coordination Platform

- Developed a Python-based workflow automation tool to streamline the coordination of penetration testing activities across multiple EMEA subsidiaries, reducing manual effort by an estimated 40%.
- Integrated with internal ticketing systems using **Jira API** to track remediation progress and generate status reports for governance teams, ensuring timely closure of identified vulnerabilities.
- Built a centralized reporting module in Python that aggregated findings from external partners and internal scans, producing standardized reports with actionable recommendations for non-technical stakeholders.

Automated Vulnerability Reporting Framework

- Engineered a reporting framework using Python and **Pandas** to process raw vulnerability data from various security tools, transforming it into structured insights for threat analysis.
- Designed and implemented data validation checks using **SQL** against a PostgreSQL database to ensure the accuracy and completeness of vulnerability data before reporting.
- Created interactive dashboards using **Power BI** to visualize key security metrics and trends, enabling management to quickly grasp the overall security posture and prioritize remediation efforts.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
