HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and automated security scripts using **Python** to enhance vulnerability detection, reducing manual review time by **40%**.
- Conducted regular source code reviews across multiple projects, identifying and triaging critical security weaknesses in **Java Spring Boot** applications prior to deployment.
- Integrated **AI-powered tools** into daily security workflows for automated code analysis and threat research, improving detection of common vulnerabilities.
- Owned the application security roadmap, defining priorities and implementing effective solutions across the engineering stack, communicating risks to both technical and non-technical stakeholders.
- Monitored and responded to security alerts in a **24/7 production environment**, participating in on-call rotations to address P1/P2 incidents.
- Collaborated with engineering teams to remediate security findings, ensuring timely fixes and improved security posture for enterprise-level applications.
- Containerized security tooling and deployed them to a **Kubernetes** cluster on **AWS EKS**, enabling scalable and consistent security assessments.

SKILLS

Security Engineering – Application Security, Source Code Review, Vulnerability Assessment, Threat Modeling, AI Security, Prompt Injection, Jailbreaks, Penetration Testing, Security Audits, GRC

Programming & Scripting – Python, Bash, Java, Spring Boot, Node.js

Cloud & DevOps – AWS, GCP, Heroku, Kubernetes, Docker, Git, GitHub, Jenkins

Databases – PostgreSQL, MySQL, Oracle

Tools & Platforms – Splunk, Dynatrace, Jira, Confluence, AI-powered security tools

PROJECTS

Automated Security Analysis Pipeline

- Engineered a Python-based pipeline that integrates **AI security analysis tools** to scan code repositories for common vulnerabilities, processing over **500 pull requests** weekly.
- Developed custom scripts to parse AI tool outputs, generating prioritized vulnerability reports with actionable remediation steps for development teams.
- Deployed the pipeline on **AWS Lambda**, ensuring scalable and cost-effective execution for continuous security assessment.

Secure API Development and Hardening

- Designed and implemented secure REST APIs using **Java Spring Boot**, incorporating input validation and secure authentication mechanisms to protect against common web exploits.
- Performed rigorous security testing, including fuzzing and penetration testing, identifying and fixing a critical vulnerability related to insecure direct object references.
- Containerized the API services using **Docker** and deployed them to a staging environment on **GCP** for pre-production security validation.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
