HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained production-grade **Python Flask** services for internal tooling, handling approximately **1,500 requests per hour** during peak business operations.
- Implemented **REST API** endpoints in **Java Spring Boot** for cross-service communication, facilitating data exchange between core financial systems and reporting modules.
- Authored automated **Python scripts** to streamline ETL processes for daily operational reports, reducing manual data aggregation time by an estimated **4 hours per week**.
- Designed and executed comprehensive unit and integration tests using **pytest** for Python services, achieving over **90% code coverage** on critical business logic.
- Refactored and optimized **SQL queries** across PostgreSQL and Oracle databases, improving data retrieval performance for key analytical dashboards by an average of **22%**.
- Containerized backend services using **Docker** and managed deployments on **AWS EC2** instances, enhancing application portability and simplifying environment setup.
- Participated in **agile ceremonies**, including sprint planning and daily stand-ups, contributing to the team's consistent delivery of features within two-week sprints.

SKILLS

Languages – Python, Java, SQL, TypeScript

Frameworks/Libraries – Spring Boot, Flask, FastAPI, Hibernate, JPA, pandas, NumPy, scikit-learn, pytest, Jest, React

Databases – PostgreSQL, MySQL, Oracle

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins

Tools/Methodologies – REST APIs, Agile, CI/CD, Git, Jira, Confluence, Splunk, Dynatrace

PROJECTS

Python-based Transaction Monitoring Service

- Developed a **Python FastAPI** application to ingest and process real-time transaction data streams, supporting **~3,000 events per second**.
- Implemented robust error handling and logging mechanisms using **structlog**, ensuring all processing failures were captured for immediate triage and resolution.
- Integrated with a **PostgreSQL** database to store transaction metadata and status, enabling efficient querying for operational dashboards.

Automated Financial Reporting Pipeline

- Engineered an end-to-end **Python ETL pipeline** using **pandas** to extract, transform, and load data from disparate sources into a central data warehouse.
- Automated the generation and distribution of weekly financial performance reports, reducing manual effort and ensuring timely delivery to business stakeholders.
- Wrote **SQL scripts** for data validation and quality checks throughout the pipeline, maintaining data integrity for downstream reporting.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
