HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **CI/CD pipelines** in **GitHub Actions** for automated builds, testing, and deployments, incorporating caching and parallelism to reduce execution times by **~30%**.
- Managed **AWS infrastructure** as code using **Terraform**, provisioning and configuring resources like EC2, S3, and VPCs to support containerized applications.
- Developed **deployment tooling** with integrated **health checks** and automated rollback mechanisms, ensuring safe and reliable releases across production environments.
- Built and maintained **observability** for services, adding comprehensive **metrics** and **alerting** to proactively identify and address issues during and after deployments.
- Responded to production alerts, participated in daily operational shifts, and performed root cause analysis for incidents, fixing underlying issues to prevent recurrence.
- Wrote and reviewed features and fixes for core exchange, clearinghouse, and brokerage services, adhering to **Haskell** best practices and ensuring code quality through rigorous **code reviews**.
- Containerized applications using **Docker** and orchestrated them on **Nomad**, defining resource constraints and ensuring consistent runtime environments.

SKILLS

Cloud & IaC – AWS, Terraform, Nomad, Docker, EC2, S3, VPC

CI/CD & Scripting – GitHub Actions, Jenkins, Git, Bash, Python

Programming Languages – Haskell, Python, Java, SQL

Observability – Metrics, Alerting, Health Checks, Rollback

Databases – PostgreSQL, MySQL, Oracle

Core Concepts – Distributed Systems, Idempotency, Consistency, Failure Modes, REST APIs

PROJECTS

Haskell Exchange Infrastructure Automation

- Automated the build and release process for critical exchange services using **GitHub Actions**, integrating static analysis and automated testing prior to deployment.
- Implemented **infrastructure as code** with **Terraform** to manage the AWS environment hosting the exchange services, ensuring reproducible and scalable infrastructure.
- Developed custom deployment scripts in **Bash** to manage application lifecycle, including health checks and automated rollback procedures for critical components.

Production Monitoring and Alerting System

- Designed and deployed a comprehensive **monitoring** and **alerting** system for financial services applications using **Prometheus** and **Grafana**.
- Wrote **Python** scripts to collect custom metrics from distributed services, providing deeper insights into application performance and user activity.
- Configured **alerting rules** based on defined service level indicators (SLIs), reducing Mean Time To Detect (MTTD) for critical issues by **40%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
