HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed **AI agents** for automated business process analysis, integrating with LLM foundation models to identify workflow inefficiencies, reducing manual review time by **~18%**.
- Designed and implemented **RAG pipelines** to ingest and query diverse internal and external datasets, enabling faster retrieval of market intelligence for strategic proposal development.
- Built analytical frameworks and interactive **dashboards in Power BI** to visualize key trends from multiple data sources, supporting strategic decision-making for innovation initiatives.
- Collaborated with senior management and external stakeholders to gather analytical requirements, translating complex data findings into clear, actionable **business recommendations** and presentations.
- Engineered Python-based automation solutions for data ingestion and transformation, supporting the development of AI-enabled tools and analytical workflows.
- Containerized AI services using **Docker** and deployed them to a cloud environment, ensuring scalability and efficient resource utilization for analytical workloads.
- Promoted data quality and governance best practices across projects, ensuring the responsible and ethical adoption of **AI technologies** and data analytics.

SKILLS

AI/ML – Generative AI, LLM Foundation Models, RAG Pipelines, AI Agents, Agentic AI Workflows, Data Modelling, Analytics

Data Analysis & BI – Power BI, Tableau, DAX, Power Query, Data Warehousing, Statistical Analysis, Data Visualisation

Programming & Scripting – Python, R, SQL, Java Spring Boot

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Methodologies & Tools – Agile, Scrum, Jira, Confluence, Splunk, Dynatrace

PROJECTS

Generative AI-Powered Market Intelligence Platform

- Developed a **RAG pipeline** to ingest and index industry reports and public data, enabling efficient querying for strategic proposal development.
- Built an **AI agent** interface using Python and LangChain to interact with the knowledge base, providing concise summaries and insights on market trends for stakeholders.
- Designed data models and visualizations in **Power BI** to present key findings and opportunities identified through the AI platform, supporting investment strategy formulation.

Automated Business Process Analysis Tool

- Created Python scripts to extract and process data from multiple internal systems, forming the input for AI analysis.
- Developed an analytical framework to identify patterns and anomalies in business processes, aiming to pinpoint areas for automation and efficiency improvements.
- Implemented a prototype dashboard using **Power BI** to visualize the analysis results and recommendations for process optimization to operational teams.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
