PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and deployed **global network standards** for LAN, WAN, Wi-Fi, and firewalls across multiple enterprise sites, ensuring consistent infrastructure configuration.
- Led incident management for network and infrastructure issues, coordinating response efforts and conducting **root cause analysis** to implement lasting fixes.
- Developed and maintained **monitoring and observability** systems for network and site infrastructure, proactively identifying and resolving potential issues before user impact.
- Automated network configuration deployment using **Python scripting**, significantly reducing manual effort and ensuring compliance with defined standards across the global infrastructure.
- Managed relationships with key connectivity and network vendors, overseeing service level agreements and ensuring reliable service delivery for all locations.
- Collaborated with Corporate Security and peer IT teams to strengthen network security posture and implement best practices across all corporate assets.
- Engineered **cloud networking solutions** within AWS VPCs, establishing secure site-to-site VPN connections to support hybrid cloud environments.

SKILLS

Networking – LAN, WAN, Wi-Fi, Firewalls, SD-WAN, Secure Remote Access, Routing, Switching, Network Standards, Network Security, Vendor Management

Cloud – AWS, VPC Design, Site-to-Site VPN, AWS Networking

Automation & Scripting – Python, Ansible, Infrastructure as Code

Observability & Monitoring – Network Monitoring, Infrastructure Monitoring, Incident Response, Root Cause Analysis, Log Analysis

Operating Systems & Infrastructure – Linux, Enterprise Infrastructure, Site Infrastructure

PROJECTS

Global Network Infrastructure Standardization

- Defined and enforced global network standards for routing, switching, and Wi-Fi across 15+ enterprise sites, ensuring interoperability and performance.
- Implemented automated configuration audits using Python scripts, identifying non-compliant devices and facilitating rapid remediation to maintain security posture.
- Partnered with network hardware vendors to test and integrate new equipment, ensuring alignment with established enterprise standards and future scalability.

Network Observability and Incident Response Platform

- Developed a centralized network monitoring dashboard using tools like Splunk and Dynatrace, providing real-time visibility into network health and performance metrics.
- Established an incident response framework that reduced average time-to-resolution for critical network outages by 20% through streamlined communication and triage procedures.
- Authored detailed runbooks for common network issues, enabling faster troubleshooting and resolution by junior support staff.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
