HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed AI-powered tools and **RAG pipelines** for automated data processing and insight generation, directly addressing the need for enhanced operational efficiency.
- Analyzed complex, multi-source datasets using **Python** and **SQL** to build analytical models, uncovering actionable insights that informed strategic decision-making.
- Integrated **Generative AI** models and **LLMs** into existing workflows to improve process automation and support data-led decision-making for internal teams.
- Translated technical findings from data analysis and AI model development into clear, concise business recommendations for senior stakeholders.
- Collaborated with cross-functional teams and **senior stakeholders** on AI and data initiatives, ensuring alignment on technical strategies and project roadmaps.
- Designed and implemented **Python** scripts for data extraction, transformation, and loading (ETL) processes, supporting the aggregation of diverse datasets for analysis.
- Containerized AI and data processing applications using **Docker** for consistent deployment across development and production environments on **AWS**.

SKILLS

AI/ML – Generative AI, LLMs, RAG pipelines, Agentic AI, scikit-learn, Python

Data Analysis & BI – SQL, Power BI, Tableau, DAX, Power Query, Data Modelling, Statistical Analysis, R

Programming & Scripting – Python, Java, Spring Boot, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Methodologies – Agile, Scrum

PROJECTS

Generative AI Assistant for Public Sector Data Analysis

- Developed a **RAG pipeline** integrating an LLM with public sector datasets to answer complex queries, improving data accessibility for analysts.
- Built a **Python** application using LangChain to manage prompt engineering and agentic workflows, enabling automated summarization of large reports.
- Designed the data ingestion and preprocessing steps to feed relevant documents into a vector database for efficient retrieval by the AI assistant.

Automated Reporting Dashboard with Power BI

- Created interactive **Power BI** dashboards to visualize key performance indicators from multiple enterprise systems, consolidating data for business stakeholders.
- Developed **DAX measures** and complex data models within Power BI to derive actionable insights from transactional and operational data.
- Automated data refresh processes using **Power Query**, ensuring timely and accurate reporting for stakeholders across different departments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
