PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and deployed **AWS infrastructure** including EC2, S3, and Lambda, configuring security groups and VPCs to meet production requirements.
- Managed and troubleshot **Kubernetes environments** (EKS) for cloud-native applications, focusing on cluster stability, pod scheduling, and resource management.
- Implemented **Linux and Windows server administration** tasks, including system patching, log analysis, and shell scripting for operational automation.
- Collaborated with software developers to integrate CI/CD pipelines using **Jenkins and Git**, ensuring automated builds, testing, and deployments to AWS.
- Enhanced system observability by integrating **Splunk and CloudWatch** for real-time monitoring, alerting on critical infrastructure and application metrics.
- Developed Python scripts to automate data extraction and reporting tasks, reducing manual effort for operational teams by approximately **20%**.
- Participated in on-call rotations, responding to P1/P2 incidents for enterprise applications, performing root cause analysis, and implementing timely fixes to meet SLAs.

SKILLS

Cloud Platforms – AWS, Azure

Container Orchestration – Kubernetes, EKS, AKS, Docker

Operating Systems – Linux, Windows

Infrastructure & Automation – Terraform, Ansible, Jenkins, Git, CI/CD

Monitoring & Logging – Splunk, CloudWatch, Dynatrace

Scripting & Programming – Python, Bash, Java, Spring Boot

PROJECTS

Cloud Infrastructure Automation with Terraform

- Automated the provisioning and management of **AWS infrastructure** using Terraform, creating reusable modules for EC2 instances, RDS databases, and S3 buckets.
- Implemented infrastructure-as-code practices to ensure consistent and repeatable deployments across development, staging, and production environments.
- Integrated Terraform with **Jenkins pipelines** for automated infrastructure updates and drift detection, reducing manual configuration errors by an estimated **30%**.

Kubernetes Cluster Management for Microservices

- Deployed and managed a **Kubernetes (EKS) cluster** to host a suite of microservices developed in Java Spring Boot.
- Configured networking policies, service discovery, and ingress controllers to enable seamless communication between services and external traffic.
- Developed custom **Bash scripts** for cluster health checks and routine maintenance tasks, improving operational efficiency for the platform team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
