HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **test strategies**, **test plans**, and detailed **test cases** for complex web and mobile applications based on software requirements and technical specifications.
- Developed and maintained comprehensive **test coverage** for the core platform, ensuring all new features and modifications were thoroughly validated.
- Authored and executed **performance test scripts** using **JMeter** to validate software applications and infrastructure for stability and performance under load, simulating peak hour traffic.
- Collaborated with Development and Architecture teams to identify and troubleshoot performance-related issues, contributing to the **optimization** of key application components.
- Integrated performance testing artefacts into the **Agile framework**, including contributing to **performance test strategy** documents and providing **optimization & KPI reports**.
- Captured and analyzed performance data using tools like **AppDynamics** and **Fiddler** to pinpoint bottlenecks and validate production readiness.
- Managed **test data** creation and manipulation to accurately simulate diverse user scenarios and edge cases for comprehensive testing.

SKILLS

Testing Methodologies – Functional Testing, Integration Testing, System Testing, Security Testing, Performance Testing, Regression Testing, User Acceptance Testing, Exploratory Testing

Tools & Technologies – JMeter, AppDynamics, Fiddler, SQL, NoSQL, API Testing, Postman, Jenkins, Git, Jira, Confluence

Programming & Scripting – Python, Java, C# (basic exposure)

Environment & Deployment – AWS, Azure, Docker, Kubernetes, CI/CD

Domain Knowledge – Web Application Testing, Mobile Application Testing, Complex Business Process Understanding

PROJECTS

Performance Validation for Enterprise Mobility Platform

- Designed and executed a comprehensive performance testing strategy for a large-scale enterprise mobility management platform, focusing on user login and device registration workflows.
- Scripted and ran load tests using **JMeter**, simulating up to 5,000 concurrent users, to identify system bottlenecks and ensure stability under stress.
- Analyzed performance metrics captured by **AppDynamics**, correlating application response times with infrastructure resource utilization to recommend tuning adjustments.

API Testing Automation Framework Development

- Developed an automated **API testing** framework using **Python** and the **Requests** library to validate the integrity and functionality of core platform REST APIs.
- Integrated the automation suite into the **CI/CD pipeline** using **Jenkins**, enabling daily regression testing of API endpoints and reducing manual testing effort by approximately **40%**.
- Collaborated with developers to define API contracts and troubleshoot reported defects, ensuring consistent data exchange across microservices.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
