HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** REST APIs for system integration, processing approximately **500 requests per minute** and supporting cross-service data exchange.
- Developed and maintained **JPA/Hibernate** entities and queries for a core financial data service, ensuring data integrity across relational database schemas and optimising transaction processing.
- Authored **JUnit** test suites for critical Java components, achieving over **85% code coverage** for new feature development and reducing regression defects by **18%**.
- Collaborated with clients to gather requirements and translate user needs into actionable backlog items, facilitating the development of digital solutions.
- Contributed to the development of reusable digital offers by applying lessons learned from project delivery and incorporating user feedback.
- Coordinated technical work across software engineering and data analytics disciplines, communicating progress, risks, and clarifying decisions to stakeholders.
- Containerised applications using **Docker** and managed deployments within a **Kubernetes** cluster, implementing basic resource limits for predictable performance.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, JPA, Hibernate, JUnit, Maven, Microservices

Cloud & DevOps – AWS, EC2, S3, Lambda, CloudWatch, Docker, Kubernetes, Jenkins, Git

Data & Analytics – SQL, PostgreSQL, MySQL, Oracle, Python, pandas, NumPy, Power BI, Tableau, DAX, Data Modelling

Methodologies – Agile, Scrum, CI/CD, Change Management, Requirements Gathering

Observability & Support – Splunk, Dynatrace, Incident Response, SLA Management

PROJECTS

Enterprise Application Modernisation (HCL Technologies)

- Modernised a core Java application by refactoring monolithic components into a **Spring Boot** microservices architecture, improving system modularity and deployability.
- Integrated new microservices with existing enterprise systems using **REST APIs** and implemented data persistence layers with **JPA** against a **PostgreSQL** database.
- Developed comprehensive API documentation and ran technical walkthroughs for internal development teams to ensure smooth adoption of the new service architecture.

Data-Driven Process Automation (HCL Technologies)

- Developed **Python** scripts to automate data extraction and transformation from disparate sources, reducing manual reporting effort by **~60%** for the operations team.
- Built **Power BI** dashboards to visualise key operational metrics derived from the automated data pipelines, enabling faster identification of process bottlenecks.
- Collaborated with business analysts to define key performance indicators and ensure the accuracy and relevance of the data presented in the reports.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
