PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices, implementing RESTful APIs for inter-service communication and handling approximately **1,500 requests per minute**.
- Engineered robust **JPA** persistence layers for enterprise applications, optimizing complex object-relational mappings and managing data integrity across relational databases.
- Designed and implemented **JUnit** and **Mockito** test suites for core Java modules, achieving over **85% code coverage** and reducing post-deployment defects by **18%**.
- Collaborated with a **6-person team** in sprint planning, technical estimation, and daily stand-ups, contributing to the timely delivery of features within an Agile framework.
- Participated in code reviews for peers, providing constructive feedback on code quality, adherence to architectural patterns, and potential performance improvements.
- Gained exposure to **NoSQL** database concepts and data modeling techniques through cross-team knowledge-sharing sessions and internal documentation.
- Containerized Java applications using **Docker**, configuring basic image builds and deploying to development environments managed by **Kubernetes**.

SKILLS

Languages – Java, Python, SQL, C++, Bash

Frameworks & Libraries – Spring Boot, JPA, Hibernate, JUnit, Mockito, pandas, NumPy, scikit-learn, FastAPI

Databases – PostgreSQL, MySQL, Oracle, NoSQL

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git

Tools & Technologies – Linux, Jira, Confluence, Splunk, Dynatrace, TCP/IP, HTTP

PROJECTS

Java-based Backend for Game Services (HCL Technologies)

- Developed a **Java Spring Boot** backend service responsible for managing player profiles and game session data, processing over **500 concurrent connections**.
- Implemented data persistence using **Hibernate** and **PostgreSQL**, designing schemas and writing efficient queries to support real-time game state retrieval.
- Integrated the service with a **Kubernetes** cluster, defining deployment configurations and basic resource management for improved scalability and reliability.

Automated Data Processing Pipeline (HCL Technologies)

- Created a **Python**-based ETL pipeline to ingest, transform, and load operational data from multiple sources into a central data store, handling approximately **15,000 records daily**.
- Automated report generation using **pandas** and scheduled execution via **cron jobs** on a Linux server, reducing manual effort by an estimated **10 hours per week**.
- Wrote comprehensive unit tests for data transformation logic using **pytest**, ensuring data accuracy and pipeline robustness.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
