PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Delivered infrastructure enablement for **computers**, **servers**, and **networks**, analysing and performing **vulnerability remediation activities** across production systems.
- Executed **account validation activities** and maintained accurate records of all IT service requests, incident reports, and maintenance logs for the infrastructure team.
- Collaborated with IT operations to improve and document **processes**, **policies**, and **procedures** for infrastructure delivery, reducing ticket resolution time by **15%**.
- Communicated effectively with internal clients to understand technology needs and provide appropriate infrastructure solutions, enhancing user satisfaction scores by **10%**.
- Authored comprehensive documentation for system configurations, deployment procedures, and troubleshooting steps, standardising knowledge sharing across the team.
- Identified and implemented improvement opportunities within the IT infrastructure delivery pipeline, streamlining deployment workflows and increasing team efficiency by **18%**.
- Managed the deployment and configuration of **Docker** containers on **AWS EC2** instances, integrating with **CloudWatch** for monitoring and logging.

SKILLS

Infrastructure Delivery – Computers, Servers, Networks, Vulnerability Remediation, Account Validation, Process Improvement, Documentation, Status Reporting

Cloud Technologies – AWS, EC2, S3, Lambda, CloudWatch

Operating Systems – Linux, Shell Scripting

Containerization – Docker

IT Service Management – Jira, Confluence, Incident Management, Service Request Management

Programming & Scripting – Python, Java, SQL

PROJECTS

Enterprise Infrastructure Monitoring and Remediation

- Developed Python scripts to automate the analysis of system logs from **Splunk** and **CloudWatch**, identifying potential security vulnerabilities and performance bottlenecks.
- Implemented automated remediation workflows for common infrastructure issues, reducing manual intervention time by **30%** and improving system stability.
- Documented standard operating procedures for incident response and vulnerability patching, contributing to a **22%** reduction in P1/P2 incidents over a six-month period.

Automated IT Asset and Configuration Management

- Designed and implemented an automated system using **Python** and **SQL** to track IT assets and configuration changes across a distributed environment.
- Built **REST APIs** with **Spring Boot** to integrate with existing IT service management tools, ensuring data consistency and reducing manual data entry by **40%**.
- Created comprehensive reports using **Power BI** to provide management with insights into asset utilisation and configuration drift, supporting strategic IT planning.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
