PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices, designing and implementing RESTful APIs for inter-service communication and external integrations.
- Engineered robust **Hibernate** and JPA entities, optimising database interactions and ensuring data integrity across PostgreSQL and MySQL schemas for enterprise applications.
- Implemented comprehensive unit and integration tests using **JUnit** and Mockito, achieving over 85% code coverage for critical Java application modules.
- Containerised backend services using **Docker** and deployed them to **AWS EC2** instances, managing configurations and ensuring smooth rollouts.
- Automated data extraction, transformation, and loading processes using **Python scripting** and **pandas**, reducing manual reporting effort by approximately **15 hours per week**.
- Managed production incidents for enterprise applications, performing root cause analysis using **Splunk** and **Dynatrace**, and adhering to strict SLAs for P1 and P2 issues.
- Collaborated with cross-functional teams in an Agile environment, participating in sprint planning, daily stand-ups, and code reviews using **Jira** and **Confluence**.

SKILLS

Languages – Java, Python, SQL, JavaScript

Frameworks/Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, Flask, FastAPI

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools – Splunk, Dynatrace, Jira, Confluence, Linux

Analytics/BI – Power BI, Tableau, DAX, R, scikit-learn

PROJECTS

Enterprise Java Application Modernisation

- Migrated legacy Java modules to a **Spring Boot** microservices architecture, enhancing system scalability and maintainability.
- Implemented data persistence layer using **Hibernate** and **PostgreSQL**, optimising query performance by **20%** for core transaction processing.
- Developed RESTful APIs for seamless integration with downstream enterprise systems, improving data flow efficiency.

Python-based Data Pipeline Automation

- Designed and built automated data pipelines using **Python** and **pandas** to extract and transform financial transaction data from multiple sources.
- Developed scheduled reporting scripts that generated operational summaries, reducing manual data compilation time by approximately **10 hours per cycle**.
- Integrated data validation checks within the pipeline to ensure data accuracy and consistency before loading into downstream analytical systems.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
