+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **production support and reliability engineering** for enterprise-scale Java/.NET applications across **AWS infrastructure (EC2, S3, Lambda, CloudWatch)**, managing SLA compliance and P1/P2 incident response with **Splunk, Dynatrace** monitoring tools—ensuring **99.5%+ uptime** for mission-critical systems
- Designed and implemented **Python-based data pipelines and ETL workflows** for automated reporting and analytics, processing structured data across **PostgreSQL, MySQL, Oracle** databases—supporting real-time operational decision-making across multiple concurrent client engagements
- Developed and maintained **REST APIs and microservices** using **Java Spring Boot**, delivering feature enhancements and bug fixes through **CI/CD pipelines (Jenkins, Git)**, with code review and quality assurance embedded in Agile delivery cycles
- Managed **project delivery workflows** using **Jira and Confluence**, coordinating cross-functional teams, tracking deliverables, and maintaining project artifacts—translating technical requirements into executable work streams across Scrum ceremonies
- Deployed containerized applications using **Docker** and orchestrated infrastructure provisioning on **AWS**, reducing deployment time by **30%** and improving environment consistency across development, staging, and production
- Completed **MSc in Data Analytics** with specialization in data engineering and infrastructure analytics, combining technical depth in Python, SQL, and cloud technologies with strategic project oversight capabilities required for complex, multi-phase data center initiatives

SKILLS

Project Management & Delivery – project coordination, Agile/Scrum, Jira, Confluence, risk identification and mitigation, stakeholder engagement, SLA management.

Data Engineering & Analytics – Python, SQL, ETL pipelines, data validation, pandas, NumPy, Flask, FastAPI.

Cloud Infrastructure & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, CI/CD (Jenkins, Git), Linux, shell scripting.

Backend Development – Java, Spring Boot, REST APIs, application performance monitoring.

Database Management – PostgreSQL, MySQL, Oracle, schema design, ad-hoc query optimization.

Monitoring & Reliability – Splunk, Dynatrace, production support, incident response, uptime optimization.

Professional Qualifications – MSc Data Analytics (National College of Ireland), BE Computer Science, IELTS Band 7.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Application Reliability & Performance Optimization (HCL Technologies)

- Managed production support portfolio for mission-critical enterprise applications serving multiple concurrent clients, implementing **SLA-driven incident response** protocols and reducing mean-time-to-resolution (MTTR) by **35%**
- Architected **Python-based monitoring dashboards and alerting automation** using **Splunk and CloudWatch**, enabling proactive identification of performance degradation and system health risks before impact to service delivery
- Led cross-functional collaboration with development, infrastructure, and client teams to implement reliability improvements, documenting lessons learned and embedding best practices into operational runbooks for sustained performance

Data Pipeline & Infrastructure Analytics Engineering (HCL Technologies)

- Designed and deployed end-to-end **ETL pipelines using Python** to ingest, validate, and transform structured data from heterogeneous **SQL databases (PostgreSQL, MySQL, Oracle)** into analytics-ready formats, supporting executive reporting and operational insights
- Optimized data workflow performance through **query tuning, index design, and schema normalization**, reducing processing time by **40%** and enabling real-time analytics for resource planning and project margin tracking
- Containerized analytics applications using **Docker** and deployed to **AWS Lambda** for serverless, scalable execution, ensuring consistent delivery of scheduled reports across distributed infrastructure with **zero downtime deployments**

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
