PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Supported production monitoring and incident response for enterprise applications using **Splunk, CloudWatch, and Dynatrace**, managing SLA compliance and triaging P1/P2 issues across multi-environment deployments—experience directly applicable to EHS KPI monitoring and incident tracking systems.
- Coordinated **data pipelines and ETL workflows** using **Python** to automate reporting and validation, demonstrating ability to manage structured data collection and continuous improvement metrics similar to EHS compliance reporting and audit findings management.
- Conducted **SQL-based data analysis** on **PostgreSQL, MySQL, and Oracle** databases for ad-hoc queries and schema validation, providing technical foundation for EHS risk assessment data management and corrective action tracking systems.
- Implemented **CI/CD pipelines using Jenkins** and maintained **Git**-based version control with code reviews, reflecting disciplined process management and documentation practices aligned with EHS Management System (ISO 14001/45001) implementation standards.
- Performed **Linux** system administration including log analysis, shell scripting, and scheduled cron jobs for automated monitoring tasks, transferring to EHS audit scheduling, compliance documentation workflows, and cross-site operational consistency.
- Engaged in **Agile/Scrum ceremonies** and cross-functional collaboration using **Jira and Confluence**, demonstrating ability to work within structured team environments and communicate EHS initiatives across manufacturing sites and global teams.

SKILLS

EHS & Compliance – Risk assessment, incident investigation, corrective and preventive actions (CAPAs), regulatory compliance, safety culture promotion.

Data Management & Analysis – SQL, PostgreSQL, MySQL, Oracle, Python, pandas, data validation, KPI reporting and monitoring.

Systems & Tools – Splunk, CloudWatch, Dynatrace, Jira, Confluence, Jenkins, Git, Linux.

Process & Documentation – ISO 14001/45001 frameworks, audit coordination, training programme support, policy standardisation, cross-site project management.

Technical Foundations – Java Spring Boot, REST APIs, Docker, AWS (EC2, S3, Lambda), FastAPI, Flask.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Application Monitoring & Reliability Programme (HCL Technologies)

- Led production support operations for mission-critical enterprise **Java and .NET applications**, implementing proactive monitoring strategies using **Splunk and Dynatrace** to reduce mean time to resolution (MTTR) and maintain **99.5% SLA compliance**.
- Developed **Python-based automation scripts** for incident triage and health-check reporting, enabling faster detection of system anomalies and supporting root cause analysis—practices directly transferable to EHS incident investigation and CAPA tracking workflows.
- Collaborated with infrastructure and development teams to standardise monitoring protocols and alert thresholds, demonstrating cross-functional coordination and continuous improvement mindset essential for multi-site EHS compliance initiatives.

Data Pipeline Automation & Compliance Reporting System (HCL Technologies)

- Designed and deployed **ETL pipelines using Python** to extract, validate, and load operational metrics from multiple data sources, reducing manual reporting effort by **40%** and ensuring data integrity for compliance audits.
- Built **SQL-based data warehouse queries** across **PostgreSQL and Oracle** databases to aggregate performance data, enabling real-time visibility into operational KPIs and supporting decision-making—framework applicable to EHS KPI monitoring and audit findings management.
- Automated scheduled reporting and notification workflows using **cron jobs and shell scripting on Linux** environments, ensuring timely delivery of compliance reports and demonstrating technical capability for EHS documentation and cross-site consistency.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
