PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **production support and incident response** for enterprise applications using **Splunk, CloudWatch, and Dynatrace**, managing P1/P2 SLAs and ensuring **99.5% uptime** across regulated environments; directly aligned with compliance and reliability requirements in controlled settings.
- Developed **Python automation scripts** for data pipelines, ETL workflows, and scheduled reporting; demonstrated ability to troubleshoot complex system issues and document solutions—core skills for technical field support and instrumentation diagnostics.
- Performed **SQL query optimization and schema validation** across **PostgreSQL, MySQL, and Oracle** databases; experience with data integrity checks and regulatory-compliant documentation practices applicable to instrument qualification and validation workflows.
- Built and maintained **REST APIs and microservices** using **Spring Boot**; deployed applications via **Docker containerisation** and **Jenkins CI/CD pipelines**—demonstrating problem-solving and systematic deployment methodologies transferable to field instrumentation setup and maintenance.
- Managed **AWS infrastructure** including EC2, S3, Lambda, and CloudWatch; configured monitoring dashboards and alerts—technical acumen directly applicable to managing instrumentation systems, remote diagnostics, and compliance record-keeping in GMP environments.
- Completed **MSc in Data Analytics** with strong analytical foundation; combined with Bachelor of Engineering background, brings structured problem-solving approach, regulatory awareness, and self-directed learning capability essential for independent field service delivery and manufacturer-led training uptake.

SKILLS

Technical Support & Troubleshooting – Production support, incident response, system diagnostics, remote troubleshooting, SLA management.

Programming & Scripting – Python, Java, Shell scripting, automation, data pipelines.

Database & Data Management – SQL, PostgreSQL, MySQL, Oracle, data validation, ETL workflows.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git, Jenkins.

Monitoring & Compliance – Splunk, Dynatrace, logging, regulatory documentation, Jira ticket management.

Professional Qualifications – MSc Data Analytics, Bachelor of Engineering (Computer Science), IELTS Band 7, Full Stack Java Spring Boot certification.

Soft Skills – Problem-solving, analytical thinking, self-motivated, organisational skills, documentation, Agile/Scrum collaboration.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Application Reliability Engineering (HCL Technologies)

- Monitored and maintained **production Java/.NET applications** using **Splunk and Dynatrace**, responding to critical incidents within SLA windows and maintaining detailed incident logs and root cause documentation—directly transferable to instrumentation troubleshooting and GMP-compliant service records.
- Implemented **automated alert thresholds** and dashboards to proactively detect system anomalies; experience with real-time monitoring and diagnostic workflows mirrors the approach needed for field instrument health checks and preventive maintenance scheduling.
- Collaborated with development and operations teams via **Jira and Confluence** to track service requests and maintain compliance records; demonstrated ability to work independently while coordinating with wider technical teams—essential for field service coordination.

Data Pipeline & Automation Engineering (HCL Technologies)

- Designed and deployed **Python-based ETL pipelines** using **pandas and NumPy** for data validation, transformation, and scheduled reporting; experience with systematic data integrity checks and audit trails applicable to instrument qualification (IQ/OQ) documentation.
- Automated repetitive tasks using **shell scripting, cron jobs, and Linux** administration; reduced manual effort and improved accuracy—methodology directly relevant to field service documentation workflows and compliance record management.
- Integrated **AWS Lambda functions** with **S3 and CloudWatch** to orchestrate data workflows; demonstrated understanding of cloud-based systems architecture and remote monitoring—skills valuable for supporting modern instrumentation platforms and remote technical support delivery.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
