+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India 09/2021 – 01/2025 (3.5 Years)

- Designed and implemented **Python-based ETL pipelines** and data transformation workflows to enrich and validate enterprise application data, demonstrating ability to structure and prepare content for downstream consumption and analysis.
- Built **REST APIs** and microservices using **Java Spring Boot** integrated into **CI/CD pipelines** (Jenkins, Git), establishing experience with content and data pipeline orchestration across Git-based workflows and automated deployments.
- Performed production monitoring and incident response using **Splunk**, **CloudWatch**, and **Dynatrace** — developing strong problem-solving skills and deep familiarity with structured logging, metadata enrichment, and system reliability practices applicable to documentation quality assurance.
- Executed **SQL** schema design and data validation across **PostgreSQL**, **MySQL**, and **Oracle**, building expertise in schema-driven and strongly structured data models essential for working with DITA XML and metadata-rich content systems.
- Containerized applications using **Docker** and deployed to **AWS** (EC2, S3, Lambda, CloudWatch), gaining hands-on experience with infrastructure-as-code and pipeline integration patterns relevant to content delivery and automation platforms.
- Collaborated with cross-functional teams on Agile projects using Jira and Confluence, translating technical requirements from product and platform stakeholders into engineering solutions — a skillset directly applicable to partnering with documentation leadership and community of practice initiatives.

SKILLS

Languages & Core Engineering – Python, Java, SQL, TypeScript/JavaScript basics.

AI & Data Engineering – ETL pipeline design, data transformation, pandas, NumPy, structured data enrichment.

Backend & APIs – Spring Boot, REST APIs, Flask, FastAPI, microservices architecture.

Infrastructure & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD pipelines, Linux.

Data & Monitoring – SQL (PostgreSQL, MySQL, Oracle), Splunk, Dynatrace, schema design, data validation.

Content & Collaboration – Jira, Confluence, Agile/Scrum, cross-functional stakeholder engagement.

Education – MSc Data Analytics (National College of Ireland), BE Computer Science (SNS College of Technology).

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin 02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India 01/2021

PROJECTS

Enterprise Data Pipeline & Content Enrichment (HCL Technologies)

- Designed and deployed **Python**-based **ETL pipelines** using **pandas** and **NumPy** to extract, transform, and validate data from multiple enterprise sources, ensuring data quality and metadata consistency across systems.
- Implemented scheduled reporting and data validation workflows that automated classification and quality checks, reducing manual validation effort and establishing patterns applicable to documentation task automation and content tagging.
- Integrated pipeline outputs with **SQL** backends (PostgreSQL, MySQL) and exposed results via **REST APIs**, demonstrating end-to-end experience moving structured data through processing stages into consumable formats.

Microservices & CI/CD Infrastructure (HCL Technologies)

- Developed feature enhancements and REST APIs in **Java Spring Boot** for enterprise applications, building experience with backend service architecture and scalable API design patterns relevant to AI-driven documentation experiences.
- Integrated services into **Jenkins CI/CD pipelines** using **Git** branching and code review workflows, gaining hands-on expertise in automated content and deployment pipeline orchestration within collaborative engineering environments.
- Monitored application health using **Splunk**, **CloudWatch**, and **Dynatrace**, developing strong observability practices and the ability to validate system reliability — skills directly transferable to ensuring AI-assisted documentation tooling quality and performance.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
