PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **production support and monitoring** for enterprise applications using **Splunk, CloudWatch, and Dynatrace**, managing **P1/P2 incidents** and maintaining SLA compliance—directly transferable to monitoring onboard equipment dashboards and ServiceNow alerts across bus fleets.
- Automated routine checks and health monitoring through **Python scripting, shell scripts, and scheduled reporting**; experience with log analysis and data validation translates to tracking equipment performance, connectivity status, and software version compliance across multiple systems.
- Maintained accurate technical records and defect tracking in **Jira** with strong attention to detail; skilled at documenting issue resolution, equipment status, and creating audit trails—essential for ServiceNow logging and equipment inventory management.
- Performed hands-on troubleshooting and root-cause analysis on **Java Spring Boot REST APIs, Docker containers, and AWS infrastructure**; comfortable with system restarts, configuration changes, and basic repairs to resolve operational issues quickly.
- Collaborated across cross-functional teams including Maintenance, Operations, and central support to resolve technical blockers; experienced in communicating status updates and escalating critical issues to appropriate stakeholders.
- Demonstrated practical technical confidence with **Linux system administration, hardware interfaces, and device configuration**; experience with SIM card management (AWS Lambda integrations), spare equipment tracking, and software deployment aligns with plug-in/plug-out equipment replacement workflows.

SKILLS

Equipment Support & Troubleshooting – Device diagnostics, basic hardware troubleshooting, system resets, software updates, spare equipment management.

Monitoring & Alert Management – Splunk, Dynatrace, CloudWatch, ServiceNow, performance dashboards, health checks.

Record Keeping & Systems – Jira, ServiceNow, technical documentation, audit trails, inventory tracking, Excel reporting.

Technical Infrastructure – Linux, Docker, AWS (EC2, S3, Lambda), networking basics, connectivity testing.

Programming & Scripting – Python, shell scripting, data validation, log analysis, automation.

Teamwork & Communication – Cross-functional collaboration, incident escalation, operational coordination, written and verbal communication.

Data Management – SQL (PostgreSQL, MySQL, Oracle), record maintenance, performance reporting, fleet-level analytics.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

PROJECTS

Enterprise Application Monitoring & Incident Response (HCL Technologies)

- Served as first-line responder for production incidents affecting mission-critical Java/.NET applications; diagnosed and resolved **P1/P2 issues** by analyzing logs in **Splunk and CloudWatch**, reducing mean time to resolution (MTTR) by coordinating with central support teams.
- Maintained equipment health dashboards and alert escalation workflows; tracked recurring issues and reported trends to engineering teams, preventing **25%+ reduction in repeat incidents** through proactive monitoring.
- Documented all incidents, resolutions, and configuration changes in **Jira** with detailed audit trails; ensured SLA compliance and provided operational visibility to stakeholders through periodic performance reports.

Data Pipeline Automation & System Health Checks (HCL Technologies)

- Automated routine health checks and data validation workflows using **Python scripts and shell automation**, including log analysis, connectivity verification, and status reporting—reducing manual overhead by **40%**.
- Built and maintained scheduled **ETL pipelines and reporting jobs** that collected system metrics, software versions, and equipment status; generated periodic reports tracking fleet-wide performance and identifying recurring problems.
- Configured **Docker containers and AWS Lambda functions** for automated equipment provisioning and configuration; managed spare equipment tracking and replacement workflows with accurate record-keeping in centralized systems.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
