PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and delivered **production-quality REST APIs** and microservices using **Java Spring Boot**, serving millions of requests across enterprise applications; owned technical requirements breakdown, code reviews, and quality standards for cross-functional teams.
- Led **end-to-end reliability engineering** for mission-critical applications using **Splunk, Dynatrace, and CloudWatch**; investigated root causes of P1/P2 incidents, reduced SLA breaches by **30%**, and mentored junior engineers on observability best practices.
- Built scalable **data pipelines and ETL workflows** using **Python, pandas, and SQL** across **PostgreSQL, MySQL, Oracle**; automated reporting and data validation, enabling product teams to make data-driven decisions on customer experience metrics.
- Architected and deployed containerized applications using **Docker** and **AWS** (EC2, S3, Lambda, CloudWatch); implemented **CI/CD pipelines with Jenkins** and Git, improving deployment frequency and reducing production defects through automated testing.
- Demonstrated technical leadership in system design and architecture discussions; contributed to decisions on technology selection, scalability patterns, and long-term maintainability, balancing speed of delivery with engineering quality across the stack.
- Applied **AI-assisted development practices** to improve productivity—leveraged LLM-based tools for code scaffolding, refactoring, and test generation while maintaining ownership of production-ready, validated code; completed **MSc in Data Analytics** with focus on data engineering and applied machine learning.

SKILLS

Languages & Runtimes – Python, Java, SQL, Linux shell scripting.

Back-End & APIs – Spring Boot, REST APIs, microservices architecture, WebSocket fundamentals.

Data & Analytics – ETL, data pipelines, pandas, NumPy, PostgreSQL, MySQL, Oracle.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, CI/CD, Jenkins, Git.

Observability & Monitoring – Splunk, Dynatrace, logging, performance tuning.

Frontend & Full-Stack – Angular, React, TypeScript/JavaScript basics.

Frameworks & Tools – Jira, Confluence, Agile/Scrum, test automation, code review practices.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Application Reliability & Data Pipeline Automation (HCL Technologies)

- Owned production support for large-scale **Java/.NET applications** across multiple customer environments; implemented proactive monitoring using **Splunk and Dynatrace**, reducing incident response time by **40%** and improving overall system reliability.
- Designed and deployed automated **Python ETL pipelines** for real-time data ingestion and validation; processed millions of records daily using **pandas and SQL**, enabling real-time dashboards and improving data-driven decision-making across product teams.
- Led architecture and implementation of **REST APIs** for legacy application modernization; mentored team on API design patterns, security best practices, and test automation, raising code quality standards and reducing defect rates in production.

Cloud Migration & CI/CD Infrastructure (HCL Technologies)

- Architected and deployed containerized microservices to **AWS** using **Docker, EC2, and Lambda**; migrated applications from on-premises to cloud, reducing infrastructure costs by **35%** and improving system scalability.
- Built and maintained **Jenkins CI/CD pipelines** integrating **Git branching strategies** and automated testing; streamlined deployment processes and code review workflows, enabling **50% faster release cycles** while maintaining production quality.
- Implemented infrastructure-as-code practices and monitoring dashboards using **CloudWatch**; established alerting thresholds and runbooks for incident response, empowering the team to detect and resolve issues proactively.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
