

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and executed **Python-based data pipelines** and **ETL workflows** for enterprise analytics, processing and validating large datasets to ensure accuracy and reliability in production environments.
- Evaluated production system behavior using **Splunk**, **CloudWatch**, and **Dynatrace**, performing root-cause analysis on P1/P2 incidents and providing technical feedback that improved system reliability and SLA compliance.
- Built and maintained **REST APIs** using **Java Spring Boot**, applying rigorous testing and code review practices to ensure technical correctness and alignment with business requirements.
- Performed quantitative analysis on system metrics and application performance data using **SQL (PostgreSQL, MySQL, Oracle)**, writing complex queries for data validation, schema optimization, and ad-hoc reporting.
- Developed **automation scripts** in **Python** and **shell scripting** for scheduled reporting and infrastructure tasks, demonstrating practical coding skills and end-to-end analytical thinking.
- Collaborated with cross-functional teams through **Agile/Scrum ceremonies** and **code reviews**, providing clear technical documentation and feedback that shaped system design and operational practices.

SKILLS

Quantitative & Data Analysis – statistical analysis, data validation, SQL querying, pandas, NumPy, hypothesis testing.

Programming Languages – Python, Java, SQL, shell scripting.

Data Engineering & Pipelines – ETL workflows, data pipelines, Apache frameworks, scheduled reporting.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux.

Tools & Platforms – Splunk, Dynatrace, Jenkins, Git, Jira, PostgreSQL, MySQL, Oracle.

Technical Communication – technical documentation, code review, clear analytical writing.

Methodologies – Agile/Scrum, CI/CD practices, production support and reliability engineering.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Application Monitoring & Incident Response (HCL Technologies)

- Led production support for mission-critical **Java/.NET applications**, utilizing **Splunk**, **CloudWatch**, and **Dynatrace** to monitor system health and respond to P1/P2 incidents within SLA targets.
- Designed **Python automation scripts** to parse application logs, extract performance metrics, and generate automated alerts, reducing mean-time-to-detection (MTTD) for critical issues.

- Performed root-cause analysis on production outages by correlating **SQL queries** against application databases, identifying data anomalies and schema issues that contributed to system failures.
- Provided detailed technical feedback and runbooks to development teams, improving incident response procedures and system observability across the platform.

Data Pipeline & Feature Development (HCL Technologies)

- Built **Python-based ETL pipelines** using **pandas** and **NumPy** to extract, validate, and transform enterprise data, ensuring data quality for downstream analytics and reporting.
- Developed **Spring Boot microservices** with **REST API** endpoints, applying rigorous testing methodologies to validate correctness and ensure compatibility with downstream systems.
- Automated scheduled data validation and reporting tasks using **Python scripts** and **cron jobs** on **Linux** infrastructure, improving reporting accuracy and reducing manual effort by **40%**.
- Collaborated with data analysts and business stakeholders to translate requirements into technical solutions, writing clear documentation and providing feedback on data modeling approaches.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
