+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Evaluated and validated **quantitative outputs** from enterprise systems by analyzing **production logs** via **Splunk, CloudWatch, and Dynatrace**, identifying root causes in statistical anomalies and data pipelines—directly analogous to assessing AI-generated analytical work for technical accuracy.
- Designed and implemented **data pipelines and ETL workflows** using **Python** with **pandas and NumPy**, processing large datasets for reporting and predictive insights; wrote **end-to-end analytical code** with clear documentation and peer review via Git.
- Conducted **statistical analysis and data validation** across **PostgreSQL, MySQL, and Oracle** databases; performed **hypothesis testing, regression analysis, and ad-hoc queries** to support business decisions and validate data integrity in production systems.
- Built and maintained **REST APIs** and backend services using **Java Spring Boot** with rigorous testing and code review practices; contributed to **experimental feature deployment** and A/B testing infrastructure in Agile environments.
- Automated complex operational tasks using **Python scripting, shell scripting, and cron jobs** on **Linux** systems; reduced manual workload and improved system reliability through custom data-driven monitoring solutions.
- Completed **MSc in Data Analytics** from National College of Ireland, combining hands-on quantitative coursework with professional experience in statistics, predictive modeling, and research methodologies; demonstrated fluency in technical writing and English (IELTS Band 7/9).

SKILLS

Programming & Analytical Code – Python, Java, SQL, Git, pandas, NumPy, shell scripting.

Data Science & Quantitative Methods – Statistical analysis, hypothesis testing, regression analysis, predictive modeling, data validation, ETL, experimental design.

Data Engineering & Pipelines – PostgreSQL, MySQL, Oracle, data pipelines, schema design, ad-hoc analysis.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Jenkins CI/CD.

Backend Development – Spring Boot, REST APIs, API design, code review.

Monitoring & Reliability – Splunk, Dynatrace, CloudWatch, SLA management, incident response.

Professional & Academic – Agile/Scrum, technical writing, English fluency (IELTS Band 7), MSc Data Analytics.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

Data Pipeline & Statistical Validation Framework (HCL Technologies)

- Architected and deployed **Python-based ETL pipeline** processing **500K+ daily records** from multiple sources; integrated **pandas and NumPy** for data transformation and validation.
- Implemented **statistical quality checks** and **anomaly detection** logic using **SQL** to validate data accuracy pre-report generation; reduced data inconsistencies by **35%**.
- Automated scheduled reporting workflows via **cron and shell scripting** on **Linux**; documented analytical methodology and code for peer review and knowledge transfer.

Production Reliability & AI Output Evaluation (HCL Technologies)

- Monitored and validated enterprise **Java Spring Boot applications** using **Splunk, Dynatrace, and CloudWatch**; assessed system behavior and quantitative correctness during P1/P2 incidents with **98% SLA adherence**.
- Designed test cases and **experimental analysis frameworks** for validating new API features; coordinated **A/B testing** and regression analysis to ensure feature quality before production release.
- Provided detailed technical feedback on system performance and data accuracy; documented findings with clear explanations and actionable insights for engineering teams.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
