PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Evaluated and validated **quantitative outputs** from enterprise systems through **3.5 years** of production support, using **Splunk, CloudWatch, and Dynatrace** to assess system reliability and accuracy against SLA targets; directly analogous to reviewing AI-generated analytical work for technical correctness.
- Designed and implemented **Python data pipelines and ETL workflows** for automated reporting and data validation across **PostgreSQL, MySQL, and Oracle** databases; demonstrated end-to-end analytical code proficiency with **pandas and NumPy** for data transformation and statistical analysis.
- Built and maintained **REST APIs and microservices** using **Java Spring Boot** with rigorous **code review** and **Git** practices, translating business logic into robust, well-documented technical solutions—a core strength for writing clear technical explanations.
- Conducted **SQL-based exploratory data analysis** and ad-hoc investigations on large datasets; performed schema design and data validation to ensure integrity and support evidence-based decision-making across engineering and product teams.
- Mastered **statistical reasoning and experiment design** through MSc in Data Analytics (completed Feb 2026), with coursework spanning hypothesis testing, regression analysis, predictive modeling, and time-series forecasting—directly aligned with quantitative problem-solving requirements.
- Demonstrated reliability and communication excellence: **IELTS Band 7/9** fluency in English, **Agile/Scrum ceremonies** participation, and incident response documentation, ensuring clarity in technical feedback and cross-functional collaboration.

SKILLS

Data Science & Analytics – Statistical analysis, predictive modeling, hypothesis testing, regression, time-series forecasting, experiment design.

Programming & Scripting – Python, Java, SQL, shell scripting, REST API development.

Data Engineering – ETL pipelines, data validation, pandas, NumPy, PostgreSQL, MySQL, Oracle.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux.

DevOps & Tools – Jenkins, Git, Jira, Splunk, Dynatrace, CloudWatch.

Frameworks & Libraries – Spring Boot, Flask, FastAPI, React, Angular.

Language & Communication – English (IELTS Band 7/9), technical writing, code documentation.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Data Pipeline & Anomaly Detection (HCL Technologies)

- Architected **Python-based ETL pipeline** to ingest, validate, and transform production telemetry from multiple **AWS** services and on-premises databases into a centralized **PostgreSQL** data warehouse.
- Implemented **statistical anomaly detection** using **NumPy** and **pandas** to identify performance degradation and data quality issues; created automated **scheduled reporting** that flagged deviations exceeding **2-sigma thresholds** for investigation.
- Reduced manual data validation effort by **60%** through automated schema change detection and data integrity checks; improved incident triage time by providing **clear technical documentation** of findings for engineering teams.

REST API Development & Performance Analysis (HCL Technologies)

- Developed and maintained **Spring Boot REST APIs** serving **100K+ daily requests**; wrote comprehensive integration tests and conducted **regression analysis** to quantify performance impact of feature changes.
- Collaborated with cross-functional teams to define API contracts and validate outputs against business requirements; documented technical decisions and trade-offs with clear explanations for code review and future maintenance.
- Used **CloudWatch** and **Dynatrace** to monitor API behavior and identify anomalies; provided actionable feedback to development teams based on quantitative performance metrics and user-facing impact analysis.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
