

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Evaluated and validated **production enterprise applications** (Java, .NET) using **Splunk, CloudWatch, Dynatrace** — managed SLA compliance and **P1/P2 incident response**, directly applying real-world reasoning about system reliability and data-driven monitoring.
- Designed and implemented **Python data pipelines and ETL workflows** for automated reporting and data validation across **PostgreSQL, MySQL, Oracle** — demonstrating hands-on experience in **statistical data processing** and end-to-end analytical code development.
- Developed **REST APIs and backend services** using **Java Spring Boot**, including feature development and bug fixes — writing clean, well-documented code with rigorous code review practices in **Git and Jenkins CI/CD** environments.
- Performed **ad-hoc SQL analysis and schema optimization** across multiple databases, validating data integrity and generating insights for technical and business stakeholders — translating raw data into actionable intelligence.
- Deployed and monitored **cloud infrastructure on AWS (EC2, S3, Lambda, CloudWatch)**, including **Docker containerisation** — combining systems thinking with quantitative observability for performance tuning and optimization.
- Completed **MSc in Data Analytics** (National College of Ireland, Dublin, Feb 2026) alongside full-time work, with coursework in statistical methods, predictive modeling, and data science best practices — demonstrating sustained quantitative rigor and continuous learning.

SKILLS

Data & Statistical Analysis – SQL (PostgreSQL, MySQL, Oracle), statistical methods, hypothesis testing, ad-hoc data validation, regression analysis, time-series concepts.

Programming & Code – Python, Java, SQL, Flask, FastAPI, REST APIs, analytical code development and review.

Data Engineering & Pipelines – ETL workflows, Python scripting, data transformation, pandas, NumPy, scheduled reporting, automation.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, shell scripting, CI/CD (Jenkins, Git).

Monitoring & Observability – Splunk, Dynatrace, CloudWatch, log analysis, performance tuning, SLA management.

Soft Skills & Tools – Technical writing, Jira, Confluence, Agile/Scrum, English (IELTS Band 7), remote collaboration.

Quantitative Foundations – Backend development, systems reliability engineering, operational data analysis, end-to-end problem solving.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

PROJECTS

Production Monitoring & Incident Response System (HCL Technologies)

- Established real-time **Splunk and Dynatrace dashboards** for enterprise application health, reducing mean time to incident detection by identifying anomalies in production metrics.
- Validated **system performance data** and logs through rigorous analysis, correlating multiple data sources to isolate root causes and provide technical feedback to development teams.
- Authored runbooks and troubleshooting guides — translating complex operational data into clear, technical explanations for cross-functional teams.

Automated Data Pipeline & Reporting Engine (HCL Technologies)

- Built **Python-based ETL pipelines** processing data across **PostgreSQL and Oracle databases**, performing **data validation and quality checks** to ensure analytical integrity.
- Developed scheduled reporting workflows using **pandas and NumPy**, generating weekly statistical summaries and trend analysis for stakeholders — combining data extraction with interpretable insights.
- Deployed pipelines on **AWS Lambda** with **CloudWatch monitoring**, ensuring reliable execution and alerting — demonstrating end-to-end quantitative code ownership and operational rigor.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
