PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Evaluated and validated **quantitative outputs** from enterprise systems by analyzing **SQL queries, data pipelines, and statistical results** across **PostgreSQL, MySQL, and Oracle** databases; ensured accuracy and real-world applicability of data-driven insights in production environments.
- Designed and implemented **Python-based analytical solutions** using **pandas, NumPy** for data transformation, time-series analysis, and predictive modeling; wrote well-documented, production-grade code reviewed by senior engineers.
- Conducted **statistical analysis and experiment validation** on application performance data using **Splunk, CloudWatch, and Dynatrace**; performed hypothesis testing and SLA-driven decision-making to optimize system reliability and reduce incident response time by **30%**.
- Developed **REST APIs and backend services** using **Java Spring Boot** and **Flask/FastAPI**; collaborated with cross-functional teams to ensure analytical code met technical specifications and business requirements.
- Automated data workflows and scheduled reporting pipelines using **Python scripting, cron jobs, and AWS Lambda**; eliminated manual processes and improved data freshness for stakeholder decision-making.
- Completed **MSc in Data Analytics** with advanced coursework in statistical inference, machine learning, and data-driven problem solving; demonstrated rigor in analyzing complex datasets and communicating technical findings.

SKILLS

Quantitative & Statistical Analysis – hypothesis testing, regression analysis, time-series forecasting, experiment design, A/B testing, statistical inference.

Programming & Coding – Python, Java, SQL, Flask, FastAPI, pandas, NumPy, shell scripting.

Data Engineering & Databases – PostgreSQL, MySQL, Oracle, ETL pipelines, data validation, schema design.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD pipelines.

Monitoring & Observability – Splunk, Dynatrace, CloudWatch, performance analysis, incident response.

Tools & Platforms – Jira, Confluence, Linux, Agile/Scrum.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Production Data Quality & Validation Framework (HCL Technologies)

- Built an automated **Python-based ETL pipeline** to validate **SQL query outputs** and detect anomalies in enterprise data; integrated with **CloudWatch** for real-time monitoring and alerting.

- Designed **statistical validation checks** using **pandas** and **NumPy** to ensure data integrity across **PostgreSQL** and **Oracle** databases; reduced false positives in incident reporting by **40%**.
- Documented analytical methodology and created runbooks for troubleshooting; enabled on-call engineers to rapidly diagnose and resolve data quality issues.

AI Model Performance Evaluation & Feedback System (HCL Technologies)

- Evaluated quantitative outputs from machine learning models deployed on **AWS Lambda** using statistical rigor; provided detailed technical feedback on predictive accuracy, bias, and real-world applicability.
- Designed benchmark datasets and test cases for model validation; wrote clear analytical code in **Python** to assess model behavior across edge cases and regression scenarios.
- Collaborated with data science and engineering teams to iterate on model improvements based on evaluation findings; documented insights in **Confluence** for knowledge sharing.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
