PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Evaluated and validated **quantitative outputs** from enterprise systems by analyzing **SQL queries**, **data pipelines**, and **statistical accuracy** across production environments; performed root-cause analysis on **P1/P2 incidents** using **Splunk** and **Dynatrace**, ensuring SLA compliance and data integrity.
- Designed and implemented **Python-based ETL workflows** and **data automation scripts** for analytical reporting; built **REST APIs** and data validation logic in **Java Spring Boot** to support downstream quantitative analysis and forecasting pipelines.
- Wrote **well-documented analytical code** in **Python (pandas, NumPy)** for data transformation, exploratory analysis, and scheduled reporting; performed **SQL** analysis across **PostgreSQL**, **MySQL**, and **Oracle** to validate data quality and support model training datasets.
- Collaborated on **A/B testing frameworks** and **experiment design** through CloudWatch monitoring and metric instrumentation; provided technical feedback during code reviews to ensure statistical rigor and reproducibility of analytical work.
- Deployed and maintained **AWS-hosted data pipelines (Lambda, EC2, S3)** with **Docker** containerization; orchestrated **CI/CD workflows** in **Jenkins** to automate testing and validation of data processing logic end-to-end.
- Completed **MSc in Data Analytics** (Feb 2025) with coursework in statistical inference, predictive modeling, and quantitative research methodology; demonstrated fluency in technical writing through Confluence documentation and cross-functional technical explanations to non-technical stakeholders.

SKILLS

Programming & Scripting – Python, Java, Shell scripting, SQL.

Data & Analytics – ETL, data pipelines, pandas, NumPy, statistical analysis, data validation.

Databases – PostgreSQL, MySQL, Oracle, SQL optimization and schema analysis.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins CI/CD, Git.

Frameworks & APIs – Spring Boot, REST APIs, Flask, FastAPI.

Monitoring & Reliability – Splunk, Dynatrace, CloudWatch, incident response, SLA management.

Quantitative Methods – Experimental design, hypothesis testing, regression analysis, time-series analysis.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Data Pipeline & Reliability Engineering (HCL Technologies)

- Designed and maintained **Python**-based **ETL pipelines** processing structured and unstructured data across multiple sources; validated data quality using **SQL** assertions and statistical checks to ensure accuracy of downstream analytical models.
- Implemented real-time monitoring and alerting for **AWS Lambda** functions and **EC2** instances using **CloudWatch** and **Dynatrace**; reduced mean time to resolution (MTTR) for data pipeline failures through automated diagnostics and **Linux**-based log analysis.
- Built **REST APIs** in **Spring Boot** to expose validated datasets and support quantitative analysis workflows; documented API contracts and data schemas in Confluence for cross-functional analytical teams.

Quantitative Monitoring & Experiment Analysis Platform (HCL Technologies)

- Developed **Python scripts** using **pandas** and **NumPy** to aggregate, analyze, and visualize operational metrics from multiple sources; automated weekly reporting of statistical summaries and trend analysis for stakeholder consumption.
- Contributed to **A/B testing infrastructure** by instrumenting feature flags in **Java** applications and capturing experiment metrics in **CloudWatch**; performed statistical hypothesis testing to validate experiment results and support business decision-making.
- Optimized **SQL queries** across **PostgreSQL** and **Oracle** to support real-time analytical dashboards; collaborated with data science teams to validate modeling assumptions and ensure reproducibility of analytical outputs.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
